

## WELCOME

The City of Moline welcomes you to this Public Information Meeting for the rehabilitation of the 16<sup>th</sup> Street Viaduct Bridge (See Project Location Map). The bridge connects 4<sup>th</sup> Avenue, and 14<sup>th</sup> Street to the Arsenal Island Bridge (Rodman Avenue) over the Mississippi River to accommodate traffic to and from Arsenal Island. It also provides alternative access to and from businesses during times of street obstructions at the railroad tracks.

The purpose of this meeting is to provide information about the proposed improvement and to solicit your comments. The meeting will address the need for the project and potential impacts to traffic within the project area during construction. Exhibits are available for your review throughout the meeting. You are invited to view and discuss all aspects of the improvement with the City of Moline staff and engineering consultants.

## PROJECT PURPOSE

The purpose of the 16<sup>th</sup> Street Viaduct reconstruction project is to provide the needed replacement of the current bridge deck, parapets, and lighting as well as spot repairs to the steel support beams. The condition of the existing bridge has deteriorated to the point where an upgrade to those elements is necessary.

## PROJECT DESCRIPTION

The 16<sup>th</sup> Street Viaduct Bridge intercepts 4<sup>th</sup> Avenue and 14<sup>th</sup> Street at street level and passes over existing streets and businesses to its connection with the Arsenal Island Bridge just north of River Drive. The bridge provides direct access for commuters wishing to travel between Arsenal Island and Moline. Weather, salt used in snow removal, vehicle use, and age have combined to result in deterioration of the bridge deck and the need for repairs. The City of Moline, in cooperation with the Department of the Army, is sponsoring the project. The City of Moline has contracted with IMEG Corporation and TERRA Engineering, Ltd. to complete the preliminary engineering and design for the bridge deck reconstruction.

The 16<sup>th</sup> Street Viaduct Bridge reconstruction is estimated to cost \$12 million dollars. The funding is provided in part from the Defense Community Infrastructure Pilot Program (DCIP) from the Department of the Army, with the remainder provided by the City of Moline.

16<sup>th</sup> Street Viaduct Bridge Reconstruction Project

## NEXT STEPS

Following this Public Information Meeting, all comments received by June 14, 2024, will be replied to as necessary. All comments will become part of the public record for the project. The preliminary engineering and design of the project will continue along with temporary easement acquisitions necessary to complete the construction. Upon completion of the project, the temporary easements will expire and those areas will be vacated by construction crews and reestablished to their original condition. The anticipated date for construction to begin is August 2025.

## PROJECT QUESTIONS + COMMENTS

Your questions and comments are an important part of this meeting. Please use the comment form provided to submit those before you leave this evening. Written correspondence for this project can also be mailed or electronically emailed to the address below:
