

# HOW DO **TERAHERTZ** RAYs DESTROY **BAD** CELLS?

**Terahertz frequencies  
vibrate at the same  
frequency as normal  
bodily cells.**

**When it  
penetrates the  
body tissue, they  
pass through  
healthy cells at  
normal  
temperatures.**

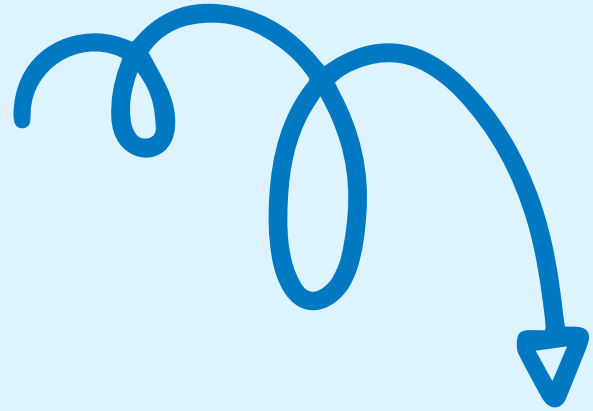

# HOWEVER...

**When they pass thorough unhealthy cells, they cause them to vibrate faster, thus increasing their cellular temperature, and ultimately, destroying them in the process.**

# **BENEFITS OF HEATING** **YOUR BODY WITH**

**iTeraCare™**

**boosts the immune system**

**increases the metabolic activity in the cells**

**increases cellular oxygenation**

**increases blood flow**

**metabolizes waste products in the body**

**softens connective tissues**

**relaxes muscle fibres**

**reduces joint stiffness**

**powerful pain killer**
