To Whom It May Concern:

I am writing to share how impactful and timely our Active Pure Technology purchase has been with Vollara. We have finally after a year of searching for products, found a high quality, science-based solution for our district that works. It was of critical importance that we find a solution to address the air quality for students and staff in our schools and office locations. When we heard about the Vollara air purifiers we were intrigued. Our initial interest was based on the fact that NASA uses this product as well as many hospitals in operating rooms. We also discovered that the Major League Baseball uses this product to protect their industry. After hearing the presentation and examining the science we were solidly impressed. We felt that this air purifier was better than any Hepa filter only system and that the Active Pure Technology in the Vollara units were able to aggressively combat microbes in the air as well as filtering large amounts of air.

I want to give testament that this product has met our expectations. Our first concern was would we receive the thousands of devices in a timely manner so we could drop them in all of our classrooms and district offices. Vollara exceeded that request and had all units on-site in our district in less than a week. The second was to determine if this would make a difference in protecting our staff and students from COVID spread as well as other contagious illnesses. Once again, we have been very pleased with these results. Our district has a relatively low vaccination rate for Kane County however our COVID transmission rate in schools has been among the lowest in the county.

Overall, our staff and parents have been very pleased with our decision to utilize the Active Pure technology as our primary mitigation for air purification. This product has decreased anxieties across the district as it relates to COVID spread concerns. The door scan labels that connect any interested party to the research and facts around this technology have also been a huge asset. I would absolutely recommend this solution to any school district.

Thank you,

Jennifer Norrell, Ed.D.
Superintendent of Schools
