DRINKING WATER MONITORING

Coliform Analysis Report

Standard Total Coliform & E.coli

Analysis	Result	Chlorine (mg/l)	Sample Receipt Temp (C)*	Set Up	Read Out	Method
120 GURNSEY DRIVE (20I0819-01) Routine Sampled: 09/17/20 07:50 Received: 09/17/20 12:54						
Total Coliforms	Present	0.05	5.9	09/17/20 14:15	09/18/20 08:15	Colilert
E. Coli	Absent	0.05	5.9			

Notes and Definitions

Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present.

The presence of Fecal coliforms and/or *E. coli* indicates that the water may be contaminated with human or animal wastes. Microbes in these wastes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a special health risk for infants, young children, some of the elderly, and people with severely compromised immune systems.

* Sample Receipt Temp: According to 40 CFR 141.21, systems are encouraged but not required to hold samples below 10 degrees C during transit.
