Medieval Castle

Spiral Staircase

Part 1

Designer's Note: Due to uncontrollable, small variances in the thickness of the steps, some of the column's core (this step) may protrude from the top. If this occurs, and the protrusion is 3mm or greater, then an extra second step (piece 2x) has been provided to shim the steps without affecting functionality. Because of this, it's important not to glue anything until the end.

The instructions assume that the steps are 3mm thick as intended. See Part 8 for special instructions regarding the shim piece.

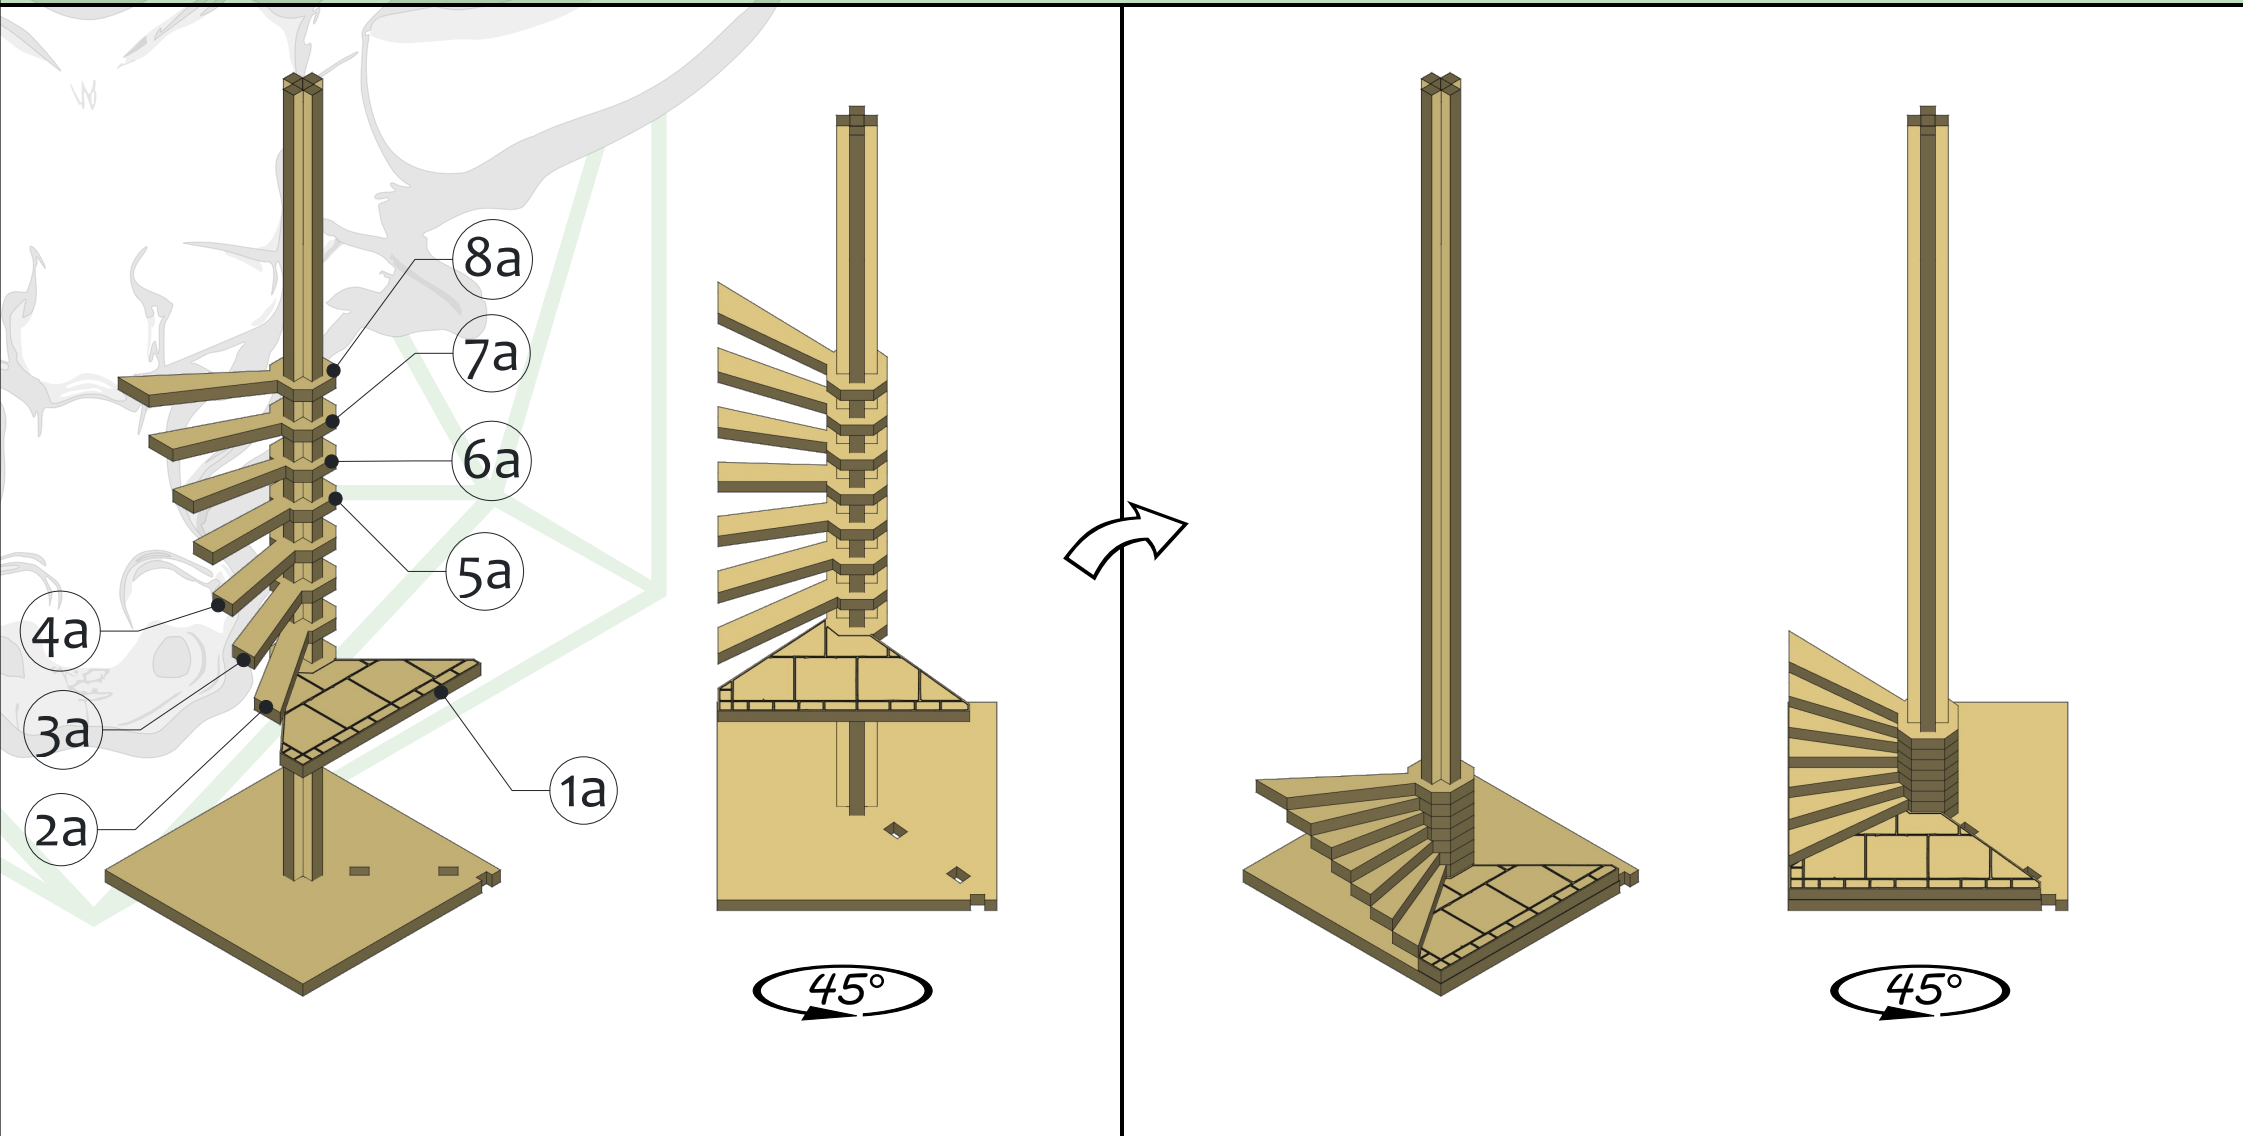

Warning: Contains small parts. May not be suitable for children under 13.

Part 8

Spiral Staircase

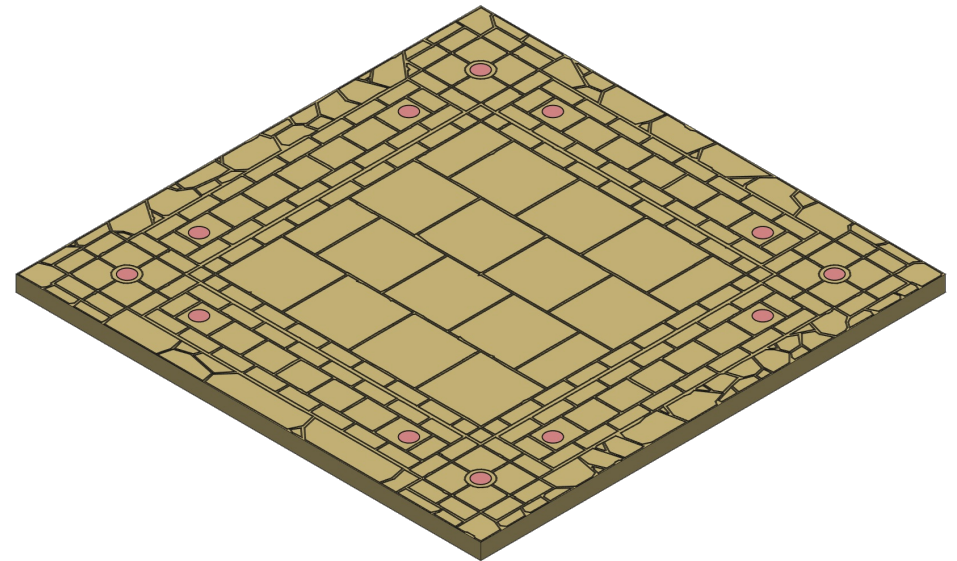

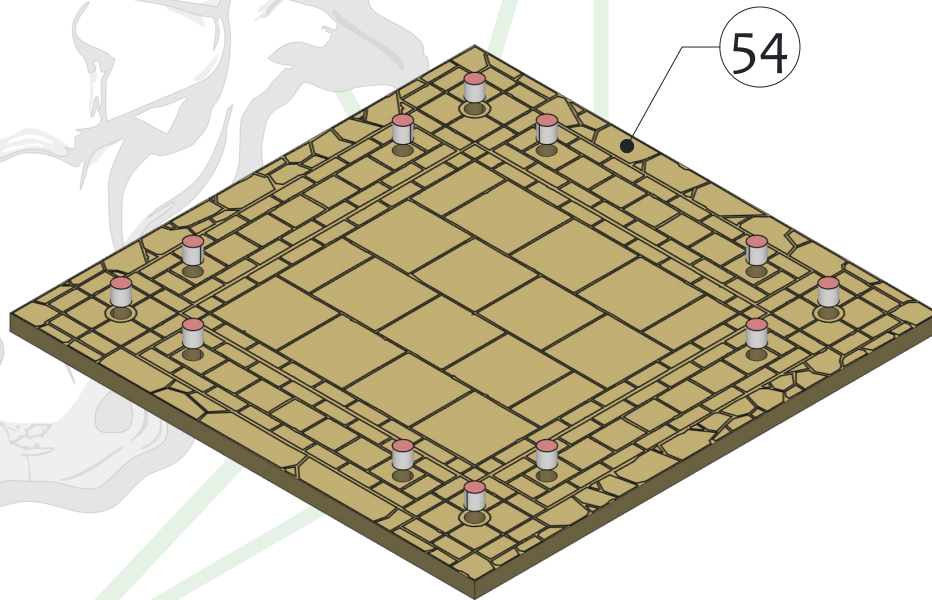

Designer's Note: If piece 2x is necessary due to variances in step thickness, remove the bottom and first step, slide the remaining steps toward the top, and add piece 2x under piece 2a. Then, put the first step and bottom back into place. Once this is finished, glue can be applied.

Warning: Contains small parts. May not be suitable for children under 13.
