COM Fabric Policy, Requirements and Instructions

Effective October, 2018

1. Ship all COM yardage to: **MARQ, Attention COM, 109 Mountin View Road, Mt Airy, NC 27030.**
2. COM material must be in compliance with CAL TB 117-2013 and/or UFAC Class 1 for flammability. UFAC Class 2 is not acceptable.
3. Please email or fax to your MARQ Customer Service Representative these 2 pages of the COM Fabric Policy signed and filled out along with a copy of the flammability test report of your COM as proof of compliance with CAL TB 117-2013 (please be sure your PO# is also on the testing certification/documentation). MARQ will not be able to process your order without this documentation.
4. Do not place orders by attaching them to COM rolls only; process your PO like all other orders.
5. Prior to shipping to MARQ, COM yardage should be inspected and verified as first quality, upholstery grade fabric by the fabric resource. Fabrics that are loosely woven or stretch easily should be properly backed. We are not responsible for any dye lot variations in COM fabric supplied to us. COM yardage must be received in one continuous piece.
6. Some fabric defects may not present themselves until the upholstery process. If this occurs, MARQ will not be held responsible for replacement yardage or repair.
7. MARQ cannot determine if COM yardage passes upholstery fabric specifications, nor can we determine if all COM material is appropriate for the intended use. For example, the responsibility for seam slippage or durability issues with a COM rests with the fabric supplier. Should any fabric performance issues arise either during or after the production process, MARQ will not be held responsible for COM replacement or furniture repair.
8. Furnished yardage requirements shown in the price list are based on 54" width, railroaded fabrics. For fabrics less than 54" in width, for fabrics that run up the bolt, and for fabrics with pattern, please supply extra fabric as indicated in the chart below. There are many variables that affect fabric requirements and yield, and we provide our best estimate of COM yardage amounts required. We reserve the right to request additional yardage based on unusual repeats or fabric designs. MARQ does not guarantee against yardage excess/shortages for COM due to variations in fabric patterns and cutting requirements.

Fabric Width	Plain Fabric	2"-14" Repeat	15"-19" Repeat	All Plaids or 20"-27" Repeat	28"-36" Repeat
54"	P/L Ydg	10%	20%	30%	40%
48"-50"	20%	30%	35%	45%	50%
45"	30%	40%	45%	50%	60%
36"	60%	65%	70%	80%	100%

9. When using Up The Bolt fabrics (non-railroaded fabrics), seams may be required that are not shown on store floor models.
10. Although the cutting orientation on the bolt and the face side of the fabric must be specified by the customer on this form and on the COM material, MARQ reserves the right to determine all other cutting decisions, unless otherwise SPECIFICALLY indicated on this form and on the form to be attached to the face of the COM fabric. Even with such instructions, cutting is based on MARQ's interpretation of the instructions, and we reserve the right to modify, if necessary, based upon the styling of the furniture.
11. We reserve the right to refrain from applying any COM, which we deem to be unworkable or not suitable for the intended application. Please do not ship your COM fabric folded in a box, as creases will damage the fabric; all COM yardage should be rolled on a tube.
12. COM orders are not returnable for any reason other than mfg. defects, which we reserve the right to verify and repair. Leftover COM yardage is not available once order is fulfilled and cannot ship back to the customer.
13. MARQ assumes no responsibility or liability for the flame retardancy of any COM or for the compliance of any COM with any other applicable codes, regulations and laws.
14. Orders are not scheduled for production until COM fabrics are received at our facility with all required information. If information is missing on a received COM, production scheduling will be delayed until we receive the required information.
15. Once you have emailed or faxed all 3 required documents, clip out the section on page 2 of this COM Policy & attach to the FACE side of your COM prior to shipping to us; that will help us with matching up the correct COM to your order.

I have read, and I agree to the items (1-15) listed above.

Construction Details

FRAME:

- Frames are constructed of sustainably certified kiln dried engineered hardwood plywood.
- Frame parts are joined with precision cut interlocking joints that are glued, stapled.
- Frames have corner blocks that are glued and screwed at stress points, especially on seat rails and other high stress areas.
- Depending on rail thickness, frames may be of a hybrid construction, adding a solid hardwood inner frame to give seat rails additional support.
- Dining chairs have hanger bolts through the front and back posts with screws in the corner blocks.
- Dining chairs have metal brackets for added strength at the side rail and back post joints.

SEAT BASE/SPRINGS:

- Seat bases are supported by a sinuous arc metal spring construction with a 60%-90% recycled content, based on material availability. Due to the design requirements of some styles, rubberized webbing may be used instead of the springs.
- Seat bases are insulated with polypropylene fabric and are padded with synthetic fiber

CUSHIONING:

- Loose seat cushions are constructed of a soy based, high resiliency 1.8 lb/cubic foot density polyurethane cushion core wrapped in layer of polyester fiber and enclosed in a down proof ticking. All loose seat cushions have the same basic construction, but the thickness of the poly core and the fiber wrap will vary depending on the style of the piece.
- Tight seats, backs, and inside arms have polyurethane padding with an overlay of polyester fiber for additional comfort.
- Loose back cushions are filled with premium polyester blown fiber enclosed in a down proof ticking. Depending on the style of the piece, some loose backs will instead be constructed of a polyurethane core with a dacron wrap, enclosed in a down proof cover.

OUTSIDES:

- All outside surfaces are padded with a bonded fiber.

FIBERS:

- Outside padding—composed of 25% recycled fibers
- Blown fiber in loose backs—composed of 100% virgin fiber that can be recycled with plastic drink bottles to make a lower grade blown fiber
- Deck pads—composed of 25% virgin polyester, 20% recycled deck pad waste, and 55% balance made of recycled plastic drink bottles, plastic films, & x-ray film
- Low melt fiber wrap for loose cushions—25% virgin polyester, 40% recycled low melt waste, and 35% balance made of recycled plastic drink bottles, plastic films, & x-ray film

Warranty and Procedure for Reporting Quality Issues October 2018

MARQ prides itself on producing top quality products. We inspect our product at several points throughout our manufacturing process to help insure that the products we ship consistently meet our standards.

Our frames and seat suspensions are guaranteed for life as long as we determine the frame or suspension defect did not result from negligence or abuse, and as long as the product is in the original upholstered cover.

LIMITATIONS:

MARQ does not in any way warranty the upholstery fabrics. Issues such as seam slippage, excessive wear, fraying, pilling, fading, and dye transfer should be directly referred to the fabric resource. For reference, our seams are sewn at 7 stitches per inch, which is industry standard.

Upon review of the information provided, we may determine that the complaint is not the result of a manufacturing defect. There are several other possible causes. For example, the situation may have arisen from freight or delivery damage, normal wear, or performance characteristics.

-We will not authorize the chargeback of any costs incurred due to a situation that was not brought on by a defect in our manufacturing process.

None of us want to be put in a position where it appears to the customer that we are not taking care of a problem. We ask that we all strive to have a clear understanding of the characteristics of upholstery, as a hand made product, and of how upholstered product can wear. For example, with use, all cushions will soften, fiber will flatten, and fabric will wrinkle.

Unfortunately, there may be occasions where product is shipped out of our facilities in a manner that falls short of those standards. When quality issues do arise, prior authorization from MARQ is required for any chargeback or RTV. The process for obtaining authorization is detailed below.

Please note: We will always require that photos be sent for our review in the case of quality complaints. These photos help to clarify the issue, and if necessary, give us a visual to review with our plant personnel. Please be sure to have service take those photos on their INITIAL visit. We will not authorize charge backs for service to make a second trip to the customer's home to take photos.

INFORMATION REQUIRED FROM OUR CUSTOMER:

Contact your MARQ customer service representative, and provide them with the following pieces of information:

- a detailed description of the complaint
- photos showing the problem
- the original PO# and customer order date
- the date the furniture was delivered to the customer
- advise if the product was inspected at the warehouse prior to delivery
- describe any carton/shipping damage

- advise if some sort of fabric treatment or protection was applied prior to delivery
- the date service was sent out
- a copy of the service report, including a detailed cost estimate if it is determined a repair is needed
- a detailed list of items MARQ would need to provide for a repair
- any action taken by your customer in an attempt to remedy the problem
- advise if there have been any prior problems with the product in question, if previous repairs have been made, and who made the repairs

PROCEDURES FOR REPAIR:

MARQ will evaluate the situation using the information provided. If we determine that the problem is due to a manufacturing defect, we will proceed as follows:

- We will issue a Return Authorization (RA) number. This number is to be used on all correspondence concerning the complaint.
- We will advise you as to whether we will authorize you to have the item repaired locally, or if we need to bring the piece back to us for repair.
- We will advise you of any additional information or materials we may need for the repair. For example, we may need a casing from the piece to match fabric dyelot for repair parts.
- If we approve a local repair by your repair service, we will advise you of the materials and/or parts we will provide, and we will advise you of the dollar amount we will authorize on the chargeback.
- If we decide we need to do the repair in house, we will work with you to coordinate the return of the item to us, and we'll give you an estimated ship date for the repaired piece.

OTHER KEY POINTS:

- Please be sure that the RA number is used on all correspondence to avoid confusion and delay in processing your request.
- Please report all quality concerns in a timely manner. These issues are more successfully solved when we are able to take care of them quickly. For example, we have a better chance of having a dye lot match a month after an order ships, versus three months.
- You do not have to wait for our approval to make the initial service visit. (Please remember to have the photos taken on that first call). If we determine there is a manufacturing defect, we will authorize you to include that service call cost in the chargeback. If we determine that there is no defect, we will not authorize a chargeback of any amount.
- Once the customer's situation has been resolved, we must have the approved chargeback amount processed within 45 days.
