

Ministry of Agriculture Programs and Services

The ministry of Agriculture is dedicated to providing quality extension to farmers, ranchers and agribusiness across the province. The Canadian Agricultural Partnership, a five-year, \$388-million investment by both the federal and provincial government has entered its final year of available funding.

There are numerous programs that can help farmers, ranchers and agribusiness innovate, prosper and grow in this province. The main producer programs assist with everything from new water infrastructure including wells, dugouts and pipelines to funding to support farm business management training to improving animal welfare and biosecurity through on-farm equipment upgrades. They also offer up to a 90% reimbursement for well decommissioning.

Details about programs can be found at saskatchewan.ca/CAP or by speaking to their specialists.
