Job Description			
ROLE AND RESPONSIBILITIES <p>Hapeman is seeking an engineering intern interested in all aspects of project development relating to machine control, automation, and testing. Candidates will have the opportunity to learn while assisting with a wide variety of tasks and projects.</p> <p>Responsibilities will be assigned based on skill set and / or natural affinity. These responsibilities may include:</p> <ul style="list-style-type: none">• Electrical / Mechanical Drafting• Documentation• Assembly• Development of Marketing Materials• Product Testing• Troubleshooting, Maintenance, and Repair• Machine Programming <p>Qualifications and Education Requirements: Pursuing a bachelor's degree or higher in engineering or related field. General working knowledge of Microsoft Office is required. This is an on-site position (at both Hapeman and customer locations), therefore, candidates must have a valid driver's license and the ability to commute. For team and customer communications, candidates must also be fluent in the English language.</p> <p>Preferred Skills: Curiosity and desire to learn new skills, even if they are outside of expectations. Exposure to industrial programming languages such as ladder logic and / or conventional programming languages such as VB.NET / C# is preferred but not required.</p>
