

BULLIED

There pulling you down
And they thrive on making you cry
They feed on the hurt
Enough to justify
Inflicting anyhow
Second thought without
Demotivating you
And drowning you in doubt

They say you're different
Embrace it 'cause you are
Don't ever let them take that away
You must stand tall
Ignore them all
Don't you let them show you the way

They say you're not worthy to be
Enough for you to believe
Suggest you kill yourself
Wishing you'd achieve
They put it on repeat
Only to engrave
But even in despair
You must be the brave

They say you're different
Embrace it 'cause you are
Don't ever let them take that away
You must stand tall
Ignore them all
Don't you let them show you the way

Repeat after me:

They're weak, they're wrong
I'm good, I'm strong
They're mean, so mean
I'm a king, I'm a queen
They oppress, they depress
I resist and I impress
No I won't let them
Make me, who I am

They're weak, they're wrong
I'm good, I'm strong
They're mean, so mean
I'm a king and I'm a queen
They oppress, they depress
I resist and I impress
No I won't let them
Make me, who I am

They say you're different
Embrace it 'cause you are
Don't ever let them take that away
You must stand tall
Ignore them all
Don't you let them show you the way

They say you're different
Embrace it 'cause you are
Don't ever let them take that away
You must stand tall
Ignore them all
Don't you let them show you the way

Show you the way!

OLD DOG

To my name, not a penny
Hard to find company
Cheap ones are so ugly
So what can I expect
I'm this world's reject
To that no one shall object
Former high society member
High earner big roller big spender
Damn I've spent on her
Accounts empty
She just left me
Should've known she'd follow
luxury

She left with my kids
She stole all my money
She ran away with my soul
I'm walking down the street
With my old dog
I'm walking down the street
With my old dog
And I'm looking for love
And I'm looking for love

The fall accelerated that
Front ended below bottom I ended
Inhaling more than smoke
Buzzing with each choke
Not only drinking coke
Blinded by the drugs
Hypnotise by the fud
Why didn't I aim for best dad mugs
Traded my family a cookie
Snacks felt easy
Mistakes are pricy

She left with my kids
She stole all my money
She ran away with my soul
I'm walking down the street
With my old dog
I'm walking down the street with
my old dog
and I'm looking for ...

She left with my kids
She stole all my money
She ran away with my soul
I'm walking down the street
With my old dog
I'm walking down the street with
my old dog
And I'm looking for love
And I'm looking for love

SAM

Side by side
Hand in hand
We were walking till the end

Standing strong
Getting along
No storm on the horizon

Smooth sailing
Enjoying
Nothing to stop us from living

We have it all
Worry free
Perfectly made to be happy

In my dreams, you're just a shadow
Somebody that I don't know
A ghost in head
An empty space in my bed

In my dreams, you're a shadow
Somebody that I don't know
A souvenir in my mind
A moment lost in time

Intentions
No conviction
The castle collapsed on our emotions

We had a dream
To build a family
We tried but did we really

No signs
Of erosion
And we couldn't see it coming

But Every day
We Drifted away
You became a friend

CHORUS

A souvenir in my mind
A moment lost in time

A souvenir in my mind
A souvenir in my mind

In my dreams, you're just a shadow
Somebody that I don't know
A ghost in my head
An empty space in my bed

In my dreams, you're just a shadow
Somebody that I don't know
Everyone sees it falling apart
Denial in my heart

In my dreams, you're just a shadow
Somebody that I don't know
A souvenir in my mind
A moment lost in time

In my dreams, you're a shadow
Somebody that I used to know
A souvenir in my mind
A moment lost in time

SHE IS THE MONSTER

I know that you're the one to blame
Insisting living out of the frame
Forcing it to go into contraction
Trying to keep everything left for
imagination

You built a house made from a deck
of cards
Please someone have a sudden
change of heart
Free the insanes, begging for
pardon
Open the gates, getting empty
asylum

You did create a monster
Eating the future
Feeding like a cancer

You did create a monster
Eating at the future
Feeding like a cancer

You brought me closer to your table
Leading to dreams and expectation
I spinned the wheel in hope you'll
be able
To seal the deal at your destination
I saw through your manipulation
Time has gone and still nothing to
show for
Tried to achieve by emulation
Repeat the cycles until you got
more

You did create a monster
Eating the future
Feeding like a cancer

You did create a monster
Eating at the future
Feeding like a cancer

You did create a monster
Eating the future
Feeding like a cancer

You did create a monster
Eating at the future
Feeding like a cancer
