"The Assurance of Quality Remains, Long after the Price has been forgotten"

## **Protecting your Property**

The longevity of any paint job depends on a number of key areas: preparation, the quality of paint and application and the skill of the operator. We have outlined the process we promise to undertake whilst painting at your property and the commitment to the client.

### ***1. Celtic Décor Preparation:***

Our preparation is one of the key markers separating us from the rest.

We perform the following prior to commencing painting:

- wash down all surfaces;
- remove all loose and flaking paint;
- remove and replace loose putty with stronger rigid mirror finish;
- fill all imperfections, sanding them until you don't know they existed, and
- sand and dust between all coats of paint

Please note that it is our practice to remove old and blistering paint. We will not be responsible for any problems incurred where this is not carried out.

### ***2. Celtic Décor Application:***

Correct application is another key component in ensuring the performance of our work.

We ensure the following:

- great care to mask, cover and protect all parts of your building (eg. floors, furniture),  
and
- all paints are premium Dulux or a brand of your choice and are supplied by Celtic Decor

When time comes to commence painting, we have a specific protocol which our workers follow to ensure the best possible outcome. Price is based upon the plans and specifications submitted.

**Internal Painting:**

- Ceilings: *Lining board*      1 coat sealer Dulux Total Prep  
2 coats Dulux Low Sheen

*Plasterboard*      1 coat Dulux Sealer / Undercoat
