

Help Disaster Area

□Summary

The OBAC aims to provide support to designated natural disaster areas in Bangladesh. As a result of the country's geographic location, Bangladesh is frequently victim to natural disasters. Monsoons have resulted in devastating floods and landslides, and inevitably death and injuries. There are millions who need assistance.

□Challenge

Those living in rural areas are impacted the most; their homes and crops are destroyed, and they often lose access to sufficient food and water.

□Solution

We will supply shelter, food, clothing, and financial assistance to these designated disaster areas.

□Long-Term Impact

The OBAC will provide those in need with a solid foundation so that, if a natural disaster strikes, they will be able to take the proper measures and minimize the damage that the disasters may bear.

Our Mission

We aspire to assist needy families primarily by providing underprivileged children with the resources and financial assistance necessary for quality education, financial and/or educational support to the youth for skills training, and women entrepreneurs with the resources and financial support necessary to start their small businesses. In addition, we aspire to supply shelter, food, and financial assistance to designated natural disaster areas and help those in need however we can.

Our initial projects will be concentrated in the rural areas of Bangladesh. Despite the country's economic growth and reducing poverty, there are still plenty in need of support.

We believe that with helping hands, we can create a brighter future for everyone. We need support from all communities to create a large social impact.

Help Educating Children

□Summary

The OBAC aims to provide underprivileged children in the rural areas of Bangladesh with financial assistance so that they can enjoy a quality education.

□Challenge

Families in poverty lack the financial means to purchase school supplies, uniforms, and food for their children. Orphans, in particular, require a place to live.

□Solution

By providing monthly or yearly financial aid to such families, children in poverty can enjoy a quality education without interruption.

□Long-Term Impact

An uninterrupted and quality education gives children the opportunity to prepare themselves for a better future, where they could become the means of financial support for themselves and their family.

Help Train Youth to Special Skills

□Summary

The OBAC aims to provide financial and/or educational support initially to the youth in Bangladesh to help them acquire the necessary skills to prosper in the job market.

□Challenge

Families in poverty lack the financial means to receive skills training.

□Solution

By providing financial aid to such families, the youth can receive special skills training and enter the job market.

□Long-Term Impact

Upon training, the youth will have the opportunity to work their dream job or explore the freelance job market. This will allow them to become the means of financial support for themselves and their family, as well as give future youth the opportunity to receive skills training.

Help Women Entrepreneur

□Summary

The OBAC aims to support small businesses in the rural areas of Bangladesh—particularly women entrepreneurs in the agriculture, poultry, fishery, grocery, and handicrafts sector who need funds to run/start their work.

□Challenge

Most women entrepreneurs in the agriculture, poultry, fishery, grocery, and handicrafts sector cannot start their business because of insufficient funding, despite being knowledgeable and more than capable to successfully run their business.

□Solution

We will help these women entrepreneurs by providing the funds necessary to start their small businesses. We will also continue to support them thereafter.

□Long-Term Impact

By initiating the OBAC project, families in need will eventually become financially stable and will also be capable of assisting other needy families in the near future.
