*Daily Value not established.

- Supports cellular, cardiovascular, and immune health.*
- Helps maintain healthy sinus, lung, and respiratory function.*
- Provides bioflavonoid and antioxidant support.*

* These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Quercetin C is a mixture of quercetin and vitamin C.

We have chosen to use quercetin phospholipid because it is up to 20 times more bioavailable as compared to standard quercetin.

Quercetin has several different benefits and it is the most researched bioflavonoid compound. As a supplement, it is very effective for histamine issues, which also tends to be helpful with gut immune function and the gut microbiome, as well as intestinal permeability.

The Vitamin C enhances, supports, and prevents oxidation of quercetin, while also helping get a more therapeutic effect of Vitamin C as an antioxidant.

Together, Quercetin C helps maintain immune system health and modulates the cytokine cascade. In fact, it can even help keep an individual's immune system stronger while providing quicker recovery and milder symptoms with viral infections.

Quercetin C is also a natural remedy during allergy season, promoting the wellbeing of sensitive and intolerant individuals in periods when allergens are abundant and widespread.

Lastly, it can be used to optimize training and performance while helping to level the effects of oxidative stress.
