

Richard Metzger  
President (2023-2024)  
Vice President (2009-2022)  
Project Manager (1998-2008)  
Metzger Construction Company

To whom it may concern,

I would like to strongly recommend Jose Diaz for all types of concrete and carpentry work, including associated layout and formwork. For more than 17 years, starting in 1998, Jose was our leading, and our most valued, concrete site foreman overseeing concrete formwork construction and concrete installation on all types of projects Metzger Construction completed. Jose was later promoted to superintendent – continuing his characteristic attention to detail, making sure project owners were satisfied with the quality and timeliness of his work. As superintendent Jose completed these projects on time and on budget, consistently paying attention to every possible detail to make the project a success. Jose was able to collaborate closely with designers and engineers to fully understand design intentions and goals.

Jose performed and oversaw all types of concrete formwork and installation. As a project manager, I personally worked with Jose on numerous large concrete tilt wall projects and also smaller challenging concrete installations. These projects included new data center buildings, large and small concrete tilt wall projects, and smaller but more challenging projects involving concrete cutting and reinstallation, such as those we completed at Minute Maid Park in Houston.

Jose can be trusted to perform and oversee all types of slabs on grade, slab on deck, and vertically formed concrete structures, as well as concrete removal and replacement. Jose's extensive knowledge and experience with carpentry and structural steel also aids his concrete expertise. Jose is a conscientious worker who will arrive early, stay late, and dig into the line details of every project he takes on. I highly recommend Jose Diaz and his company Concrete Construction Solutions, LLC for all concrete and related work.

Sincerely,

*Richard Metzger*
