PROFESSIONAL EXPERIENCE

Construction Manager II / Cell Technician III **Techdash Telecom**

2021-2023

- Collaborated with real estate, RF, and A&E teams to provide detailed construction scope of work for macro sites.
- Managed and coordinated with general contractors and tower crews, ensuring timely completion of projects and proactive resolution of obstacles.
- Developed and maintained project schedules, addressing potential issues and delays with effective solutions.
- Ensured compliance with safety regulations, building codes, and quality standards.
- Coordinated power utility walks and telco walks with transport vendors.
- Initiated equipment ordering and CQ orders after final CD approval.
- Installed, troubleshooted, and configured various telecommunications equipment, including DBA 224, DUL 2001, DUS 4102, and Cisco ASR 920

Integration Technician **NuData Techcom**

2021-2021

- Constructed vertical racks, installed AMIA Chassis, and Baseband Units.
- Performed migrations and upgrades on legacy equipment supporting GSM, AWS, and LTE technologies.
- Integrated Airscale AMIA, installed ABIA and ASIA cards.
- Decommissioned and inventoried BBU equipment, installed and tested SMM alarm shelf.
- Provided Closeout Packages and maintained pre-photos.

Tower Technician III **Iconic Communications, LLC**

2018-2020

- Led and supervised teams of multiple technicians, managing projects to meet deadlines and budgets.
- Mentored and trained Tower Techs on antenna installation, alignment, TMA's, Diplexers, Coax, Connectors, Jumpers, and installation of steel platforms and grounding.
- Interact professionally with subcontractors, safety personnel, and customers.
- Conducted pre- and post-installation fiber testing using Anritsu equipment, ensuring proper signal loss.

Tower Technician II **E. M Enterprises General Contractors, Inc.**

2013-2018

- Managed cellular integrations and night cutovers.
- Read blueprints, performed complete cabinet swaps, and constructed wave guide and full sector buildouts.
- Installed Fiber, Hybrid, power, grounding, and Coaxial lines.
- Managed warehouse and conducted inventory, received, and distributed materials to proper subcontractors.
- Maintained Antenna PIMs and conducted Fiber testing.
- Conducted Single Mode and Multi-Mode testing using an OTDR.
- Installed, terminated, and tested Eupen and CommScope I wasn't so good I don't know what I just said it's not some slow birds I almost put holding you on my present obstacles do you have a truck yourself coaxial cables, ensuring high quality connectivity and minimal signal loss.
