

# *Business Description*

## *The Scholar Blueprint*

**The Scholar Blueprint specializes in culturally responsive and relevant educational coaching and consulting. With over 10 years of experience, The Scholar Blueprint team helps students take action and see results in their educational journey.**

**How far a student goes in life should not be determined by their zip code, parent's bank account balance, or who they know. Unfortunately, these very things hinder many. The Scholar Blueprint believes strongly in culturally responsive and relevant education, meeting students where they are and helping them create a YES, I CAN mindset.**
