Re: Gulf Harbor Marina, Void Fill

Thank you for allowing Florida Shoreline and Foundation (Florida Shoreline) the opportunity to provide a quote for the additional work at the marina. Our summary of the work and cost of each scope of work.

Florida Shoreline will supply the labor, equipment, and materials necessary to attempt to fill the voids below the existing concrete slab north of the new forklift pad per the following:

- Florida Shoreline will drill access holes through the existing slab and pump flowable fill into the void.
- The flowable fill will be supplied and placed until a reasonable and agreed upon amount has been pumped below the slabs.
- The void fill will be considered complete when the void has been filled to the satisfaction of the Gulf Harbor or capacity of structure has been met.
- As discussed, Florida Shoreline cannot guarantee all the voids will be filled nor guarantee against future settlement of the structure (where the flowable fill is pumped and/or other areas).
- Florida Shoreline cannot guarantee against future washout through the existing seawall.
- Florida Shoreline reserves the right to cease flowable fill installation if determined that void is at capacity or reasonably believes structure is at capacity.

For the Price of (time and material):

Mobilization:	\$ 650.00
Flowable fill (up to (1) truck	\$13,560.00

Should the void(s) be greater than one truck load, additional flowable fill could be supplied and pumped for an additional cost of \$825.00 per cubic yard.

Customer to provide water and electrical source. Due to conditions present on site, an exact quantity of fill cannot be determined in advance. It has been agreed that Florida Shoreline will make every reasonable attempt to fill void present without compromising the capacity of the structure, and makes no guarantee all voids will be filled.
