**VACCINATION SUGGESTIONS**

**\*\*PUPPIES SHOULD NOT BE EXPOSED TO IMPROPERLY VACCINATED DOGS, DOG PARKS, PETSMAART/PETCO, DOG GROOMERS, ETC UNTIL THEY ARE 20 WEEKS OLD AND FULLY VACCINATED!\*\***

6 WEEKS – Distemper/Adenovirus/Parvo/Parainfluenza Vaccine (DA2PP) and Deworm

9 WEEKS - Distemper/Adenovirus/Parvo/Parainfluenza Vaccine (DA2PP) and Deworm

12 WEEKS - Distemper/Adenovirus/Parvo/Parainfluenza Vaccine (DA2PP) and Rabies Vaccine and Deworm

15 WEEKS - Distemper/Adenovirus/Parvo/Parainfluenza With Lepto Vaccine (DA2PP) and Bordatella Vaccine and +/-Canine Influenza Vaccine and Deworm

18 WEEKS - Distemper/Adenovirus/Parvo/Parainfluenza With Lepto Vaccine (DA2PP) and +/- Canine Influenza Vaccine Booster and +/- Rattlesnake Vaccine and Deworm

21 WEEKS - +/- Distemper/Adenovirus/Parvo/Parainfluenza Vaccine (DA2PP) and +/- Rattlesnake Vaccine Booster

\*NOTE - Only recommend boosting out to 20/21 weeks of age if in a high risk area – you can consult your veterinarian on this

6-8 MONTHS - Spay/Neuter and Microchip if not already done AND 4dx Test

1 YEAR and ON - Follow annual vaccinations as suggested by current veterinarian.

*NOTE: +/- indicates that a vaccine is optional pending if area is high risk*

*\*\*Please consult with your primary care veterinarian in regards to initiating Flea/Tick prevention, Heartworm prevention, and internal parasite deworming.*
