

# ACQUIRED BRAIN INJURY (ABI)

## EMOTIONAL CHANGES

#InvisibleIllness

Bleeding from a cavernoma, epileptic seizures, and brain surgery to remove a cavernoma can all cause Acquired Brain Injury which can result in changes to how a person functions in the following areas:

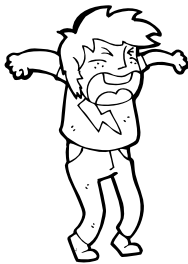

**IRRITABILITY (SHORT FUSE)**

**DEPRESSION, ANXIETY, & ANGER**

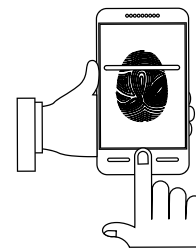

**CRYING FOR NO REASON**

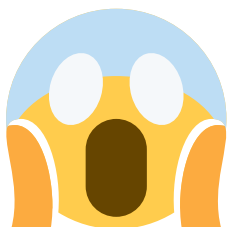

**BEHAVIOURAL OUTBURSTS**

**SADNESS & FRUSTRATION**

**LOSS OF SELF IDENTITY**

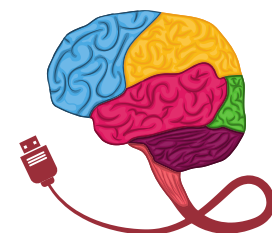

**FEAR OF THE FUTURE & MORE BLEEDS/STROKES**
