

PSSAM PRECEPTORSHIP PROGRAM

The Science & Art of Medicine

AESTHETIC MEDICINE

Open only for Licensed
Physicians of any discipline
or any specialization.

PSSAM
"The Science and Art of Medicine"

International Partners for the PSSAM Preceptorship Program

PSSAM PRECEPTORSHIP PROGRAM

The Intensive Preceptorship Program provides a thorough learning experience in aesthetic medicine. Participants benefit from theoretical lectures, live demonstrations, and hands-on return demonstrations.

The program also includes on-site training and covers essential business and legal aspects of the field. This well-rounded approach prepares participants to excel in clinical practice and understand the broader dynamics of the aesthetic industry.

Lip Fillers done by Dr. Kristina Meman of PSSAM BATCH 2

“The Science & Art of Medicine”

Theoretical & Hands-On Training

Our program offers 70% hands-on training and 30% theoretical learning, blending practical skills with key principles to provide a comprehensive understanding of aesthetics.

Upselling and Business

You master consumable pricing, clinic pricing strategies, and how to tailor beauty plans, making you a vital asset to any clinical operation.

Complications Management

Learn effective strategies to navigate unexpected challenges, ensuring the safety and well-being of your patients.

Legal Principles in Aesthetics

Learn protocols for addressing complaints and disputes, emphasizing effective communication.

Introduction to Aesthetic Medicine

- Definition and scope of aesthetic medicine, and the importance of understanding facial anatomy in aesthetic practice.

Face Anatomy for Aesthetic Doctors

- Facial muscles and their functions, nerve innervation, and vascular anatomy.

Fitzpatrick Skin Type

- Understanding skin phototypes, implications for treatments, and tailoring procedures to different skin types.

Skin Anatomy

- Layers of the skin, blood and lymphatic supply, and the role of collagen and elastin.

Common Skin Lesions

- Benign and malignant lesions, recognition and diagnosis, and aesthetic approaches to lesion management.

Module 1

SKIN ADNEXA

Acne Vulgaris

- Causes and triggers in aesthetics, management strategies, and integrating acne treatment into aesthetic practice.

Pigmentary Disorders

- Exploring hyperpigmentation and hypopigmentation, aesthetic treatments, and tailoring approaches for different skin types.

Striae (Stretch Marks)

- Understanding causes and types, techniques for reducing appearance, and managing patient expectations.

Varicose Veins

- Overview of varicose veins, treatment options, and collaboration with vascular specialists for optimal results.

Hands - On Training:

- Sclerotherapy (Spider Veins Removal)
- Stretchmarks Removal,
- Acne Scar Subcision

MODULE 2

SKIN ISSUES

Bioaesthetic Points

- Exploration of Key Bioaesthetic Points on the Face and Body.
- Practical Application and Techniques for Targeting Bioasethetic Points

Biostimulators

- Introduction to Biostimulators and their Role in Aesthetic Medicine
- Types of Biostimulators and their Mechanisms of Action
- Incorporating Biostimulators in Aesthetic Treatment Plans

Cosmeceuticals

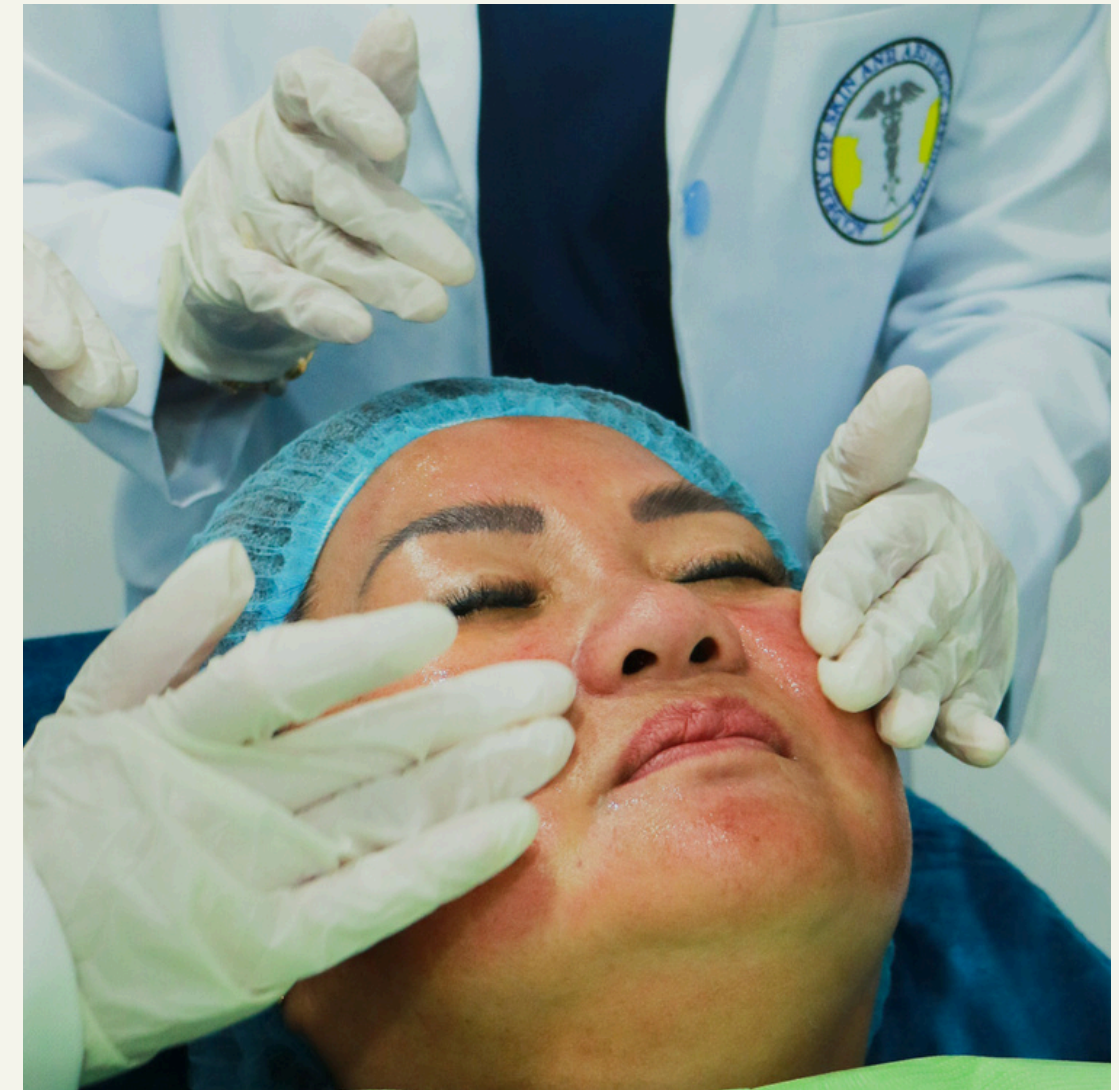

- Understanding the Science behind Cosmeceuticals
- Evaluation of Key Ingredients and Formulations
- Customizing Cosmeceutical Regimens for various skin concerns

Ethical Drips

- Exploring Ethical Drips in Aesthetic Medicine
- Types of Intravenous Drips and their benefits
- Considerations for Ethical Drip Administration Patient Safety

MODULE 3

COSMECEUTICALS & BIOSTIMULATORS

**Return Demonstration:
Bioaesthetic Points
& Skin Boosters**

**RTD:
Biostimulators**

MODULE 4

THE PANICULUM

Return Demonstration: Non-Surgical Liposuction (Face & Body)

Mesotherapy

- Understanding the Principles and Mechanisms of Mesotherapy.
- Target Areas and Applications in Aesthetic Medicine.
- Practical Application and Techniques for Mesotherapy.

Non-Invasive Skin Tightening

- Overview of Non- invasive Skin Tightening Techniques.
- Techniques and Modalities for Skin Tightening.
- Patient Selection and Combining Treatments for Optimal Results.

The Panniculus

- In-Depth Exploration of the Panniculus in Aesthetic Medicine.
- Understanding the Anatomy and Function.

MODULE 5

BOTULINUM TOXIN

**Return Demonstration:
Botox for Face or Body**

Overview of Botulinum Toxin

- Introduction to Botulinum Toxin as an Endotoxin produced by Clostridium Botulinum
- Mechanism of action at the neuromuscular junction (NMJ)
- Rapid and irreversible paralysis of NMU leading to muscle paralysis

Aesthetic Applications and Injection Techniques

- Non-surgical cosmetic treatment targeting wrinkles and lines on the face and neck
- Identifying good candidates for Botulinum Toxin treatment
- Injection techniques for body and face.

Different Brands and Formulations

- Overview of Botox Products.
- Detailed information on Onabotulinum toxin A, Abobotulinum toxin A, and Incobotulinum toxin A.
- Average onset, noticeable results, and duration of effects for each brand.

Mechanism of Action

- Understanding the pharmacological site of action at the neuromuscular synapse.
- Achieving chemodenervation of cholinergic neurons.
- Resulting in the localised absence of skeletal muscle activity or automatic control of target organs.

Hyaluronic Acid Fillers

- In-depth exploration of Hyaluronic Acid (HA) fillers
- Mechanism of action and biophysical properties
- Classification, biodegradation, and FDA indications

HA Fillers Injection Techniques

- Depth of injections and injection techniques
- Serial puncture, fanning, and cross-hatching methods
- Comprehensive understanding of specific HA fillers and clinical

Complications and Risk Management

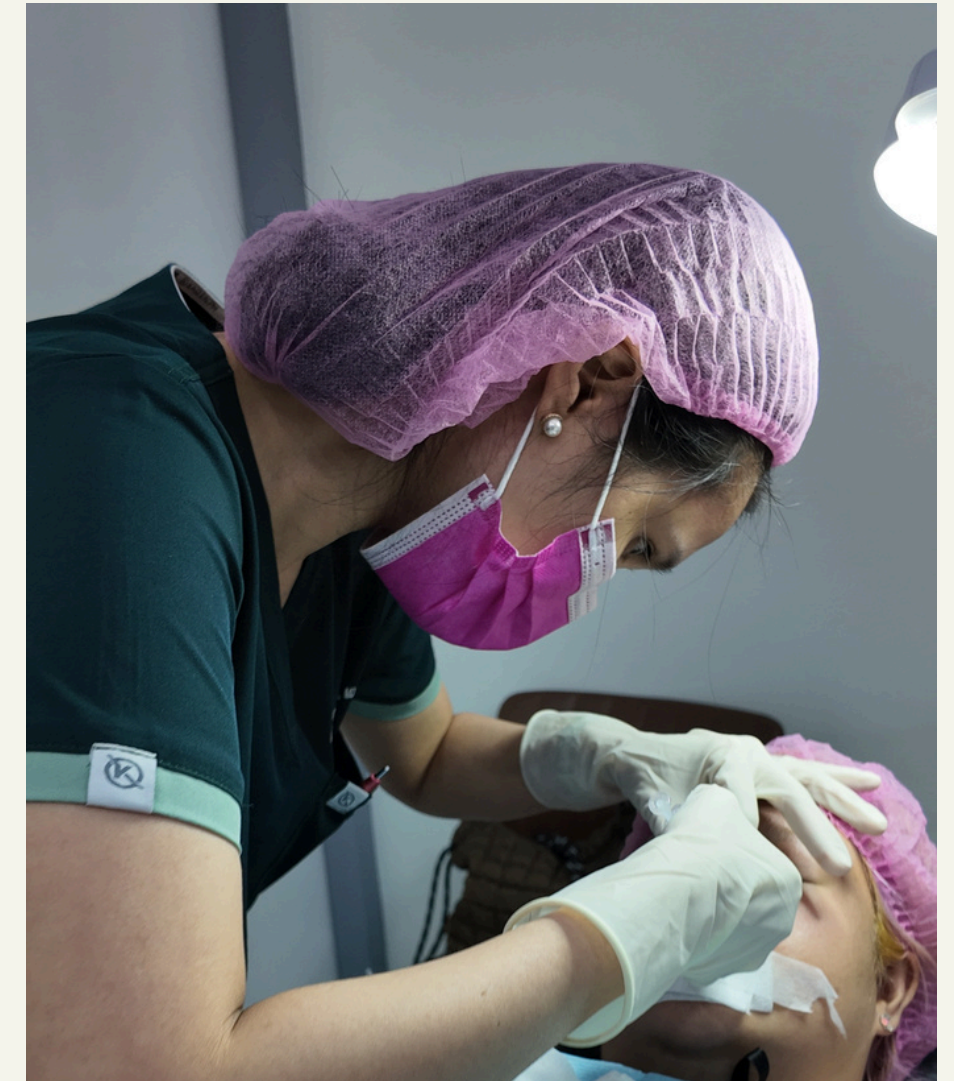

- Common and rare complications of HA fillers
- Vascular occlusion risks and areas of caution
- Minimizing the risk of vascular occlusion and the role of hyaluronidase

Post-Procedure Care

- Immediate and delayed signs of complications
- Importance of immediate action in case of complications
- Post-HA filler procedure care: dos and don'ts

MODULE 6

HYALURONIC ACID FILLERS

Return Demonstration:
Fillers return demo (Jaw, Lips, or Eyes)
Advance Masterclass by Stun Medical Philippines

**Return Demonstration:
Hiko Noselift, Hallow Cheeks,
Double Chin, Swanlift.**

MODULE 7

THREADS POLYMERS

**Advance Masterclass:
White Medience**

Introduction to Facial Threads

- Overview of Facial threads as non-surgical rejuvenation tools
- Distiction between various types of threads and their applications
- Safety considerations and

Hiko Nose (Non-Surgical Rhinoplasty)

- Understanding the Hiko Nose Thread technique
- Indications and benefits for nasal reshaping
- Case studies and practical applications

Tanxing Nose Threads

- Exploring different Tanxing Nose Thread options (Tip, Diamond Tip, Tip Threads)
- Techniques for nose tip enhancement and reshaping
- Case Studies and practical applications

Monothreads

- Comprehensive study of Monothreads (Linear, Screw, Spiral, Tornado)
- Applications for skin tightening, texture improvement, and volume enhancement
- Patient assessment and thread selection considerations

MODULE 8

STEM CELLS & PRP

**Return Demonstration:
“Vampire Facial”**

Facial Rejuvenation with PRP

- Techniques for Facial Rejuvenation using PRP
- Complementing aesthetic procedures with PRP
- Achieving optimal outcomes through combination therapies

PRP Combined with Dipegmenting Cocktails for Melasma

- Addressing Melasma with PRP and dipegmenting cocktails
- Treatment protocols, patient selection, and expected outcomes
- Managing complications and ensuring safety

Advanced Applications: PRP with Stem Cells

- Synergistic effects of combining PRP with stem cells
- Advanced techniques in skin rejunivation and scar revision

Session 9: Safety Protocols and Ethical Considerations

- Ensuring safety in stem cell and PRP procedures
- Ethical considerations in the use of stem cells and PRP
- Regulatory guidelines and responsible aesthetic practice

Biostimulators for Butt Augmentation

- Techniques for non-surgical butt augmentation with PLLA
- Creating volume and improving shape
- Long-term effects and maintenance strategies

Patient Consultation and Communication

- Effective communications with patients seeking non-surgical body enhancements
- Setting realistic expectations and discussing outcomes
- Informed consent and managing patient concerns

Combination Therapies for Body Augmentations

- Techniques for non-surgical butt augmentation with PLLA
- Creating volume and improving shape
- Long-term effects and maintenance strategies

Complications and Safety Protocols

- Identifying and managing complications in non-surgical body augmentations
- Safety protocols and emergency procedures
- Follow-up care and monitoring for long-term success

Hands-On Training and Demonstrations

- Practical demonstrations of non-surgical body augmentation techniques
- Hands-on training with PLLA biostimulators
- Q&A sessions for participant engagement

MODULE 9

BODY-NON SURGICAL AUGMENTATION

After 2 Sessions at 1 month interval
6 vial per session

School Demo :
Non-Surgical Breast and BBL enhancements

White Medience
Do more, Feel better, Live younger.

The Philippine Science of Skin and Aesthetic Medicine (PSSAM) is proud to announce its partnership with White Medicine to offer an advanced masterclass focused on thread techniques. This exclusive program is designed for aesthetic practitioners seeking to enhance their skills and knowledge in the art of thread lifting.

**Advance Techniques on:
Hiko Noselift, Mid Face, Cogs V lift, and more!**

The Philippine Science of Skin and Aesthetic Medicine (PSSAM) is excited to partner with Stun Medical Philippines to present an advanced masterclass on dermal fillers. This masterclass is designed for PSSAM Doctors in looking to deepen their understanding and enhance their skills in the art of facial volumization and rejuvenation.

(New Program starting Batch 8 onwards)

Advance & Holistic Training in Aesthetics

COMPLICATIONS MANAGEMENT TRAINING

RISK IDENTIFICATION

- In-depth exploration of potential complications associated with Botox, Fillers, and Threads
- Understanding patient factors and anatomical considerations influencing complication risks.

PREVENTIVE MEASURES

- Proactive strategies to minimize the risk of complications during and post-procedure
- Patient assessment techniques to identify individuals prone to specific complications.

EMERGENCY PROTOCOLS

- Development of a comprehensive understanding of emergency situations related to non-surgical aesthetic procedures
- Practical training in quick and effective responses to emergencies for enhanced client safety

HANDS-ON SIMULATION

- Simulation exercises for real-time practice in complication management (Note: Depending if there are models)
- Application of emergency protocols in controlled scenarios to build confidence and proficiency.

Advance & Holistic Training in Aesthetics

COMPLICATIONS MANAGEMENT TRAINING

CASE STUDIES

- Analysis of real-life case studies highlighting complications and their successful resolutions
- Discussion on lessons learned and best practices for different scenarios.

COMMUNICATION SKILLS

- Training in effective communication with clients during and after a procedure, addressing concerns and managing expectations.
- Building a client-friendly approach to maintain trust and transparency.

POST-PROCEDURE CARE

- Instruction on post-procedure monitoring and care to identify early signs of complications
- Strategies for managing complications during the recovery phase

CONTINUOUS IMPROVEMENT

- Encouragement of a continuous improvement mindset through ongoing learning and staying updated on industry advancements
- Access to resources and networks for continued support and knowledge sharing

Advance & Hollistic Training in Aesthetics

LEGAL PRINCIPLES IN AESTHETIC PRACTICE

REGULATORY LANDSCAPE :

- Exploration of national and regional regulations governing non-surgical aesthetic procedure
- Understanding licensing requirements, scope of practice, and adherence to legal standards.

INFORMED CONSENT :

- Detailed insights into the informed consent process, ensuring practitioners communicate effectively with clients about risks, benefits, and alternatives.
- Developing customized consent. forms to meet legal and ethical standards

DOCUMENTATION PRACTICES :

- Best practices for maintaining accurate and comprehensive patient records
- Understanding the importance of documentation in legal defence and risk management

PROFESSIONAL LIABILITY :

- Examination of professional liability issues specific to aesthetic practices
- Strategies for mitigating legal risks and protecting against malpractice claims.

Advance & Holistic Training in Aesthetics

LEGAL PRINCIPLES IN AESTHETIC PRACTICE

ETHICAL CONSIDERATIONS :

- Analysis of ethical dilemmas commonly encountered in non-surgical aesthetics
- Promotion of ethical behaviour, patient autonomy, and respect for cultural diversity

ADVERTISING AND MARKETING

- Guidance on legal and ethical standards for advertising aesthetic services
- Ensuring transparency, accuracy, and compliance with regulatory guidelines

PRIVACY AND DATA PROTECTION

- Understanding and compliance with data protection laws in the context of patient information
- Implementation of secure data management practices

HANDLING COMPLAINTS AND DISPUTES

- Protocols for addressing patient complaints and disputes in a legally compliant and ethical manner
- Developing effective communication strategies to resolve issues amicably.

EMERGING LEGAL TRENDS

- Stay informed about evolving legal trends and their potential impact on non-surgical aesthetic practices.
- Preparedness for adapting practices to changing legal landscapes.

AESTHETIC MEDICINE
