CFG Series Cartridge Filter

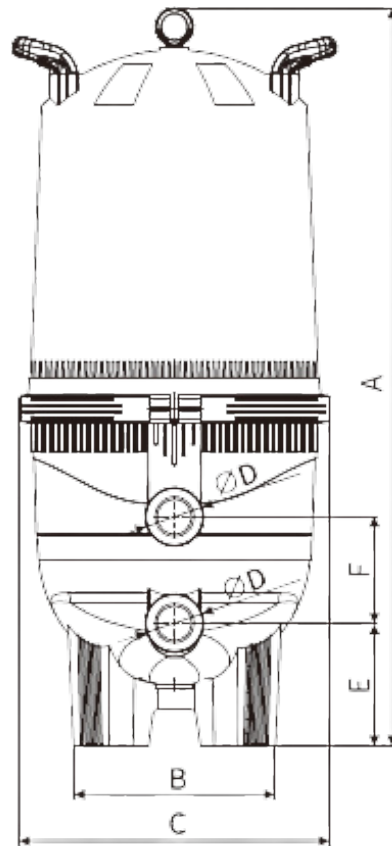

- Four-cartridge design traps more dirt and extends time between cleanings.
- Cartridges are easy to remove and rinse.
- Clamp ring allows easy access to cartridges and internal parts to speed service routines.
- Premium Pressure gauge, 2" Fittings included and automatic pressure relief valve
- 1 1/2" drain is easy to access and located to ensure complete draining during winterization.
- Fiberglass-reinforced polypropylene tank is strong and corrosion resistant for extra long life.

CFG Series identifies our "greenest" and most efficient equipment choices. Water flows very efficiently through the GL320-520 filters, often allowing the use of smaller pumps or lower pump speeds to minimize energy use. And when you rinse cartridges rather than backwash, you can significantly reduce water use, too.
