

BOTOX/DYSPORE[®] TREATMENT:

BEFORE YOUR APPOINTMENT

- If possible, arrive without creams or make-up on the treatment area. Cleansing products are available for your convenience.
- Pre-treatment photos will be taken.
- The treatment areas will be wiped with alcohol.

AFTER YOUR APPOINTMENT

- For the first 4 hours after treatment, keep your head upright.
- Do not apply pressure to/or massage the treatment area.
- Pinpoint bleeding may occur and will resolve quickly.
- Rarely, patients may develop mild bruising and or sensitivity around the injection site. This will resolve within the first week after treatment.
- Any immediate redness or swelling will subside within an hour and may be covered with makeup.
- For optimal results and to restore collagen loss, we recommend the **Obagi Nu-Derm Complete System** or the **Epionce System with Intense Defense Serum**.

WHAT TO EXPECT

- Rarely, transient headaches are reported. Tylenol may be taken as needed. This is not an indication that each treatment will result in this experience. In fact, Botox injections are indicated for relief of chronic headaches and migraine.
- **Your results will appear gradually over the period of 7-10 days.**

MAXIMIZING BENEFITS OF YOUR TREATMENT

- Our Skin Care Specialists will review and compose a simple, customized skin care program for you to begin before your treatment as well as once your skin has healed to maintain the desired results. A quality, daily home skin care regime will ensure that you maximize and maintain the benefits of your treatment

For any questions or concerns, please call EFC Medspa at (281) 560-3955. In the event of a medical emergency, immediately go to the nearest hospital and/or ER or dial 911.
