Order forms available at:  
[swcdekalbil.org](http://swcdekalbil.org)

## Why capture rainwater?

Rain barrels are an excellent way to help the environment in urban areas because they reduce storm water runoff, which can carry pollutants and sediment directly to creeks and rivers. In addition, heavy rains can impact local sanitary sewer systems by increasing the gallons per day of wastewater a facility must treat.

## Nothing goes to waste!

All barrels are made from recycled food-grade drums once used to carry food products such as olives and pickles.

# Order Form

Name: \_\_\_\_\_  
Address: \_\_\_\_\_  
Phone: \_\_\_\_\_  
Email: \_\_\_\_\_

All rain barrels are being offered at \$75.00 and tumbling composter at \$175.00.

Each rain barrel is approximately 55 gallons and is fully assembled with a screen mesh lid, two overflow spigots and a bottom drain plug.
