10. Crop Rotation- us history on this field.	•	-			crop		Cover Crops (Summer 2 vith NRCS guidelines (mus	020-Spring 2021)- Established t have some growth):	
Crop	2021 2	2020	2019	2018	2017		Winter hardy- single spec	ies	
Corn							Winter hardy- 2 or more s	pecies	
Soybean							Winter kill- single species		
Small Grain:							Winter kill- 2 or more spe		
Hay/Forage:							Cover crop was terminate	d AFTER spring 2021 cash	
Other:]	crop planting		

Example: A field has been in corn/soybean rotation for over a decade. In 2021 it was planted to corn. Place an "X" adjacent to corn for the years 2021, 2019, 2017. Soybean would have an "X" for 2020, 2018. If your crop is not listed, i.e. Grain Sorghum, write your crop on the line and mark "X" in the year(s) planted. Do not record cover crops here.

Discussion: Time period varies slightly here. Any cover crops established in 2020 either prior to harvest or after a summer crop was harvested count. Examples: aerial application into standing corn or drilling after wheat harvest. Wheat is not considered to be a cover crop.

	Soil Sampling- Use the previous 4-year field history:		
	Not sampled in the last 4 years Sampled every 4 years or less Spring or Summer sampled Fall sampled GPS sampled (by grid or zone)	every "Sam	rission: Here is a great example of why you should read item in each category. If a respondent simply marked apled every 4 years or less" they may have missed points if didn't indicate when the field was sampled or if GPS was
Alm	ost done. The next category is tillage practices broke	n dow	n into Fall 2020 and Spring 2021 categories.
13.	Fall Tillage - Starting after harvest of the 2020 crop:		
	No tillage or low disturbance fertilizer toolbar Strip tillage on field classified as non-HEL Shank type fertilizer bar <u>and</u> no other tillage performed Any full width operation <u>not</u> exceeding a 3" depth Any full width operation exceeding a 3" depth Any full width operation on soybean stubble	we el tillag the fo if soy	session: With numerous possibilities for soil preparation, lected to keep the options fairly simple. No tillage and strip e are easily definable. Full-width tillage can be tricky. In all, focus on the depth of machine operation and also note abean residue was tilled. In the spring, how many passes made and was fall tillage performed?
14.	Spring Tillage- 2021 field operations:		
	No tillage or low disturbance fertilizer toolbar Strip tillage or Strip freshener on non-HEL field, or shank type for Any full width operation, limited to a single pass, where <u>no</u> fall tillage. Any full width operation, two or more passes, where <u>no</u> fall tillage.	tillage v ige was	was performed s performed
brok	Ily, your nutrient management strategies are a large sen these into two sections defined by specific time per occurred at any time during the crop year being rev	eriod	ls. A third section reviews activities that may
