EXPERIENCE

INFOSYS

Bangalore, India

Technology Analyst – Consultant

2024 to 2026

- Modernized loan processing systems for a \$500MM+ European banking portfolio by re-engineering legacy workflows with AI automation, cutting approval timelines 20% and annual operating costs by \$250K
- Directed a 14-member cross-functional team across Denmark, Sweden, Finland, and Lithuania to deliver collateral valuation tools on schedule, achieving full KPI alignment and strengthening client retention across Nordic markets
- Built AI-powered document review tools leveraging Natural Language Processing (NLP)-based validation, shortening review cycles by 30% and improving processing accuracy by 18% across Nordic banking operations
- Automated collateral reporting workflows, eliminating 300+ manual hours annually and enabling credit officers to redirect capacity toward higher-risk loan assessments

Senior Systems Engineer – Associate Consultant

2023 to 2024

- Developed an executive analytics platform aggregating \$400MM+ in loan data, enabling the bank's Danish credit leadership to make faster data-driven lending decisions and improving risk assessment efficiency by 25%
- Integrated GDPR-compliant data protection features into core banking solutions, achieving zero compliance violations across regulatory audits in four Nordic countries
- Facilitated monthly cross-functional strategy sessions with European stakeholders and delivered product demonstrations for 200+ consultants, reducing project delays by 18% and lowering post-training support requests

DANSKEIT, DANSKE BANK

Bangalore, India

Associate Software Engineer

2022 to 2023

- Accelerated IT solution delivery by 23% through monthly IT-business strategy sessions with regional credit teams, directly aligning technology initiatives with evolving business priorities
- Safeguarded a \$200MM+ platform migration by architecting risk-based contingency plans, ensuring zero data loss and uninterrupted operations for 10,000+ users throughout the transition period
- Optimized database performance for valuation datasets, contributing to 30% faster report generation; standardized handover documentation during the Infosys-DankseIT acquisition, accelerating systems integration
