EDUCATION

Southern Methodist University, Cox School of Business

Dallas, TX

Master of Business Administration

Projected May 2028

- Cox Military Scholar

Norwich University

Northfield, VT

Bachelor of Science in Business Administration

June 2025

EXPERIENCE

General Dynamics Information Technology

Tel Aviv, Israel

Sr Systems/Network Administrator, U.S. Military Group - Israel

2024-2026

The U.S. Military Group (MILGP) operates at the intersection of defense, diplomacy, and international partnership, advancing U.S. national security objectives through security cooperation and military coordination with allied nations.

- Served as sole technical liaison between multiple organizations within the U.S. Embassy-Israel and USCENTCOM, coordinating secure information flows that enabled real-time strategic decision-making across two live regional conflicts.
- Advised senior military leadership on mission-critical communications continuity, directly supporting the USCENTCOM Commander's strategic operations during active operations.
- Provided overnight systems support during operational surges and crisis scenarios, rapidly resolving network and communications issues to sustain real-time decision-making for stakeholders.
- Enhanced organizational resilience by developing and enforcing continuity governance framework adopted by MILGP that reduced operational risk and improved reliability of secure communications.
- Coordinated end-to-end logistics and security operations supporting embassy and partner-nation personnel movements, including flight-line transportation, secure base access, and lodging across multiple locations.
- Entrusted with the secure transport of distinguished visitors via high-speed police motorcade, a role requiring precision, composure and split-second decision-making under conditions with zero margin for error.

75th Ranger Regiment, U.S. Army Special Operations Command

Fort Moore, GA

U.S. Army Ranger Signal Systems Support Team leader

2020-2024

The 75th Ranger Regiment is the U.S. Army's premier special operations force, conducting high-tempo, globally deployed missions on 48-hour recall.

- Provided communications support during overseas contingency operations, coordinating between ground personnel and aircrews under night/blackout conditions to enable safe, on-schedule departures of evacuation flights.
- Managed over \$15M in equipment, ensuring zero discrepancies and reliable connectivity while enabling real-time decision-making across joint forces.
- Led U.S. Army Command and control operations (C5ISR), ensuring seamless integration of communications, intelligence, and surveillance systems supporting mission-critical objectives.
- Rapidly mastered and deployed advanced communications infrastructure - including SATCOM, secure networks, and tactical command platforms - across distributed teams with no formal ramp-up time.
- Developed cross-functional teams of 5-10 junior Rangers to deliver integrated systems under compressed deployment timelines, improving field reliability.
- Collaborated with multinational and interagency partners to execute complex operations, strengthening interoperability and stakeholder alignment.
