# Why Desktop as a Service (DaaS)?

In addition to data protection, security and compliance concerns, most organizations are struggling to manage a new platform and deliver IT services to end-users on their own. Evolve IP has designed the Managed DaaS solution to solve this problem and unburden IT from the day-to-day management of supporting a vital business technology.

The problem with traditional desktops
Procure, Provision, Provide

- Increased risk due to Mobility
- Resource requirements increase with time
- A Single Point of Failure
- Expensive / Unavailable / Logistical challenges
- Management Nightmare
- Scalability Challenges

Ability to **Focus** on IT initiatives

Tailored end-user experience

Improved **Security & Manageability**

Productivity & Scalability with seamless access

Why Choose DaaS?

72% of IT leaders have invested or will invest in DaaS in the next 24 months.

By 2024, **80%** of virtual desktops served to remote users will be DaaS, up from fewer than 30% today.

79% Say cloud VDI is more secure than traditional models.

76% of organizations at least had one ransomware attack in the last one year.

40% average savings with DaaS compared to traditional on-premises data centers.

26% reduction in total infrastructure costs on average.
