# FXEA Technologies

How to download, install and test an Expert Advisor from our website into MetaTrader 4 platform:
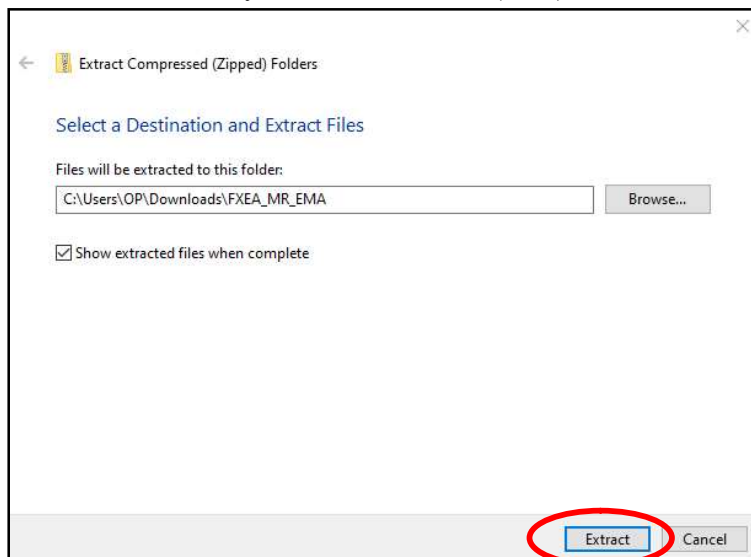

1) Select the EA you want to have access from the Products page.

2) The downloaded file will be saved inside your "Downloads" folder within Windows. Click on the folder icon, or go directly to the "Downloads" folder in your computer.
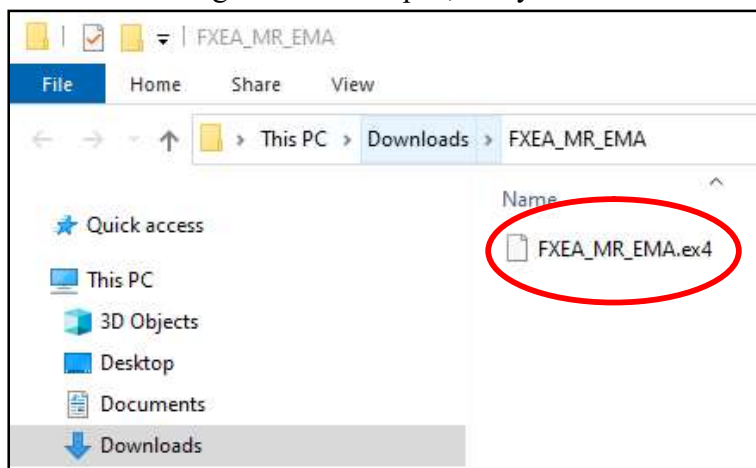

3) Right click on the file and select "Extract"; the EA will be an executable type file, with an extension ".ex4".

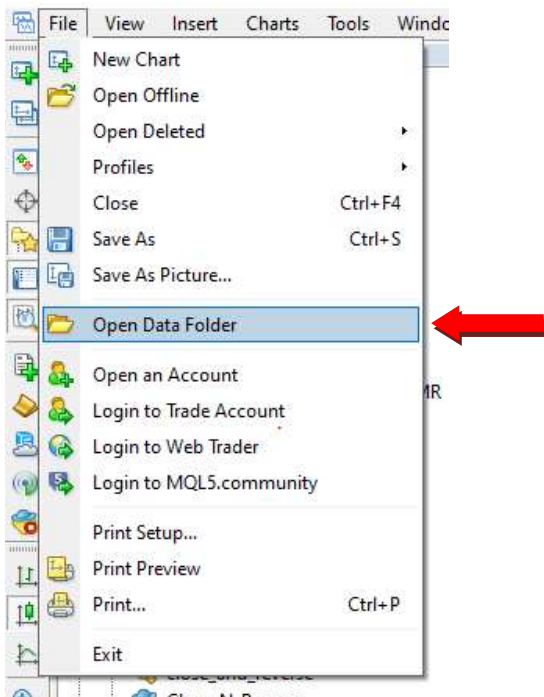

4) Select the location you want to extract (save) the file, and click on the "Extract" button:

5) The folder containing the file will open, and you will be able to see the ".ex4" file.
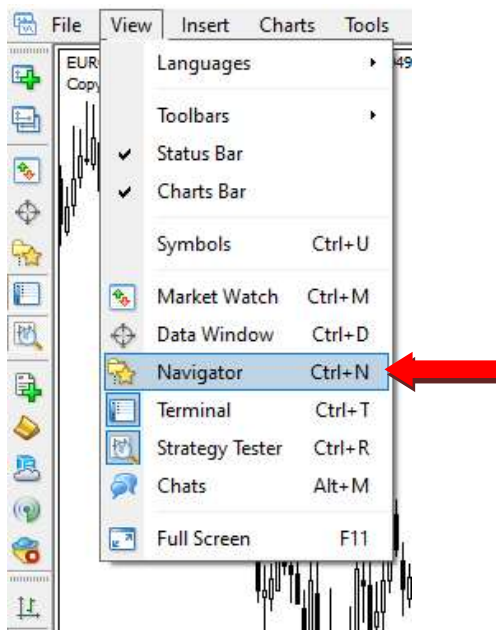

6) Open the MetaTrader 4 terminal, and click on "File → Open Data Folder"; this will open a new window containing the files for MetaTrader 4:

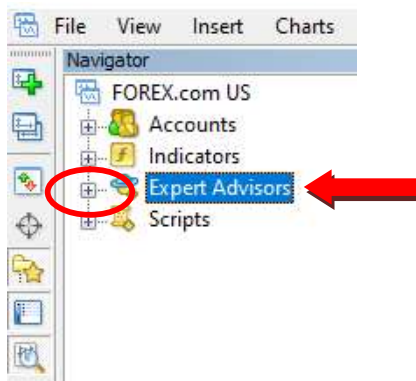

7) Select "MQL4 → Experts"; copy and paste the ".ex4" file you downloaded into this location, or into a folder of your choice within the "Experts" folder in MetaTrader 4:
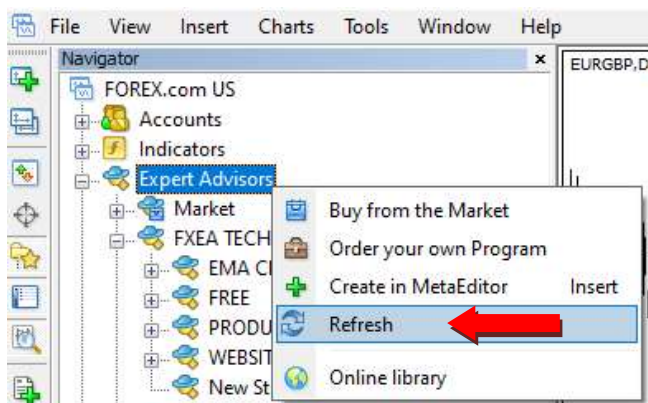

8) On MetaTrader 4, select "View → Navigator" in order to open the Navigator window, so you can find the Expert Advisor you just saved:

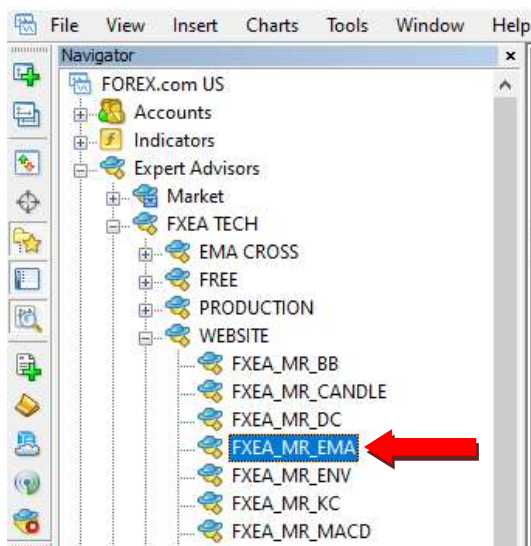

9) Click on "Expert Advisors" to expand the menu containing the EA's:

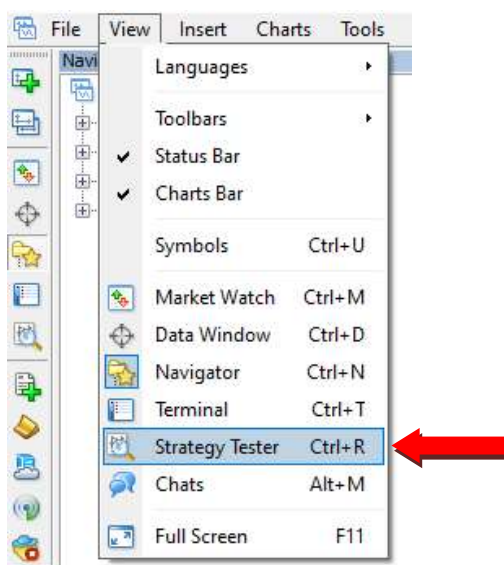

10) Right click on the "Expert Advisors" menu again, and select "Refresh". This will update the folders on the platform:
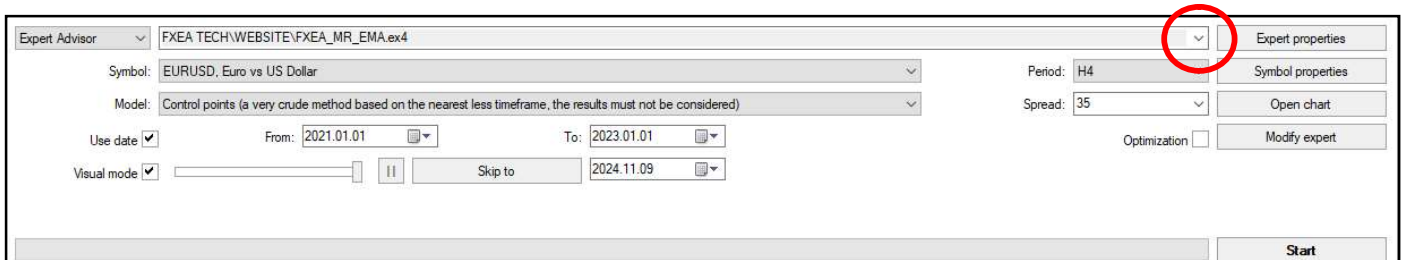

11) The Expert Advisor will be saved on this folder, or in the folder you've selected. In this example, it was saved under the folder "Expert Advisor → FXEA TECH → WEBSITE"

12) Now that your EA is installed, it's time to open the Strategy Tester Menu. Go to "View → Strategy Tester" (or just click "Ctrl + T" to open the interface:

13) The Strategy Tester will open, and now you can select the EA you just downloaded:

14) For a complete explanation of the platform capability, please visit:
