

International Association for Dental Research (IADR)/American Association for Dental Research (AADR)
Vancouver, Canada, June 2019

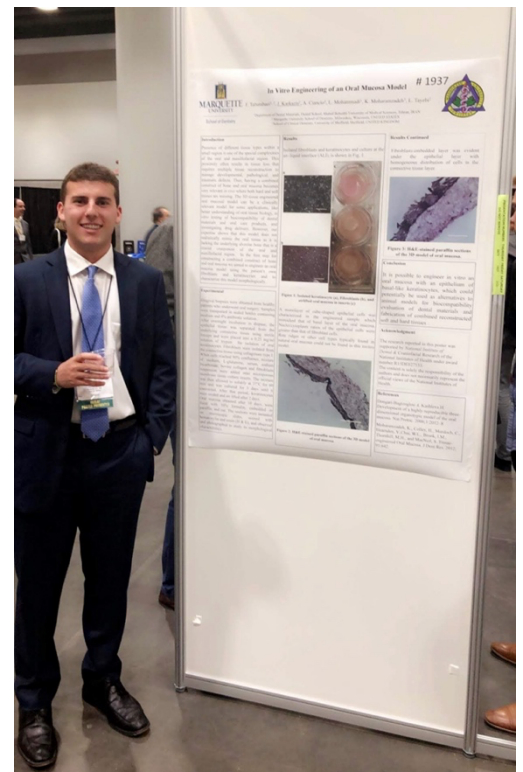

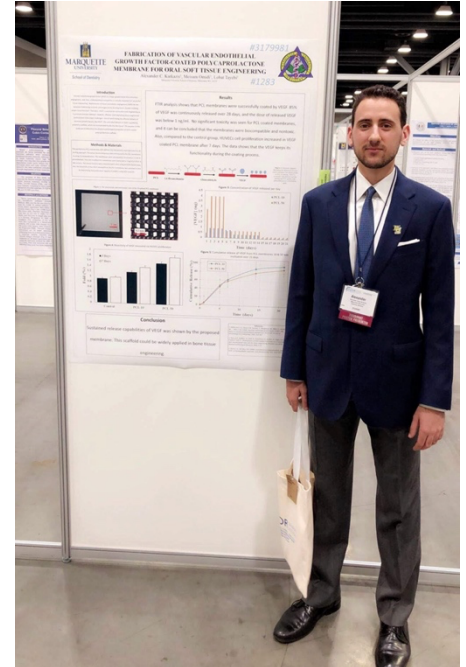

Drs. Alexander and Emelia Karkazis presented their research at the IADR/AADR Research Convention in Vancouver, Canada in 2019, as second year dental students. Their younger brother, John Karkazis, a current second year dental student at Marquette University School of Dentistry, presented his research as well as a sophomore in college – the only college student selected from Marquette University!

PICTURE ON THE RIGHT: Dr. Alexander Karkazis presented his research at the Poster Presentation in Vancouver, Canada. His research was titled *"Fabrication of Vascular Endothelial Growth Factor-Coated Polycaprolactone Membrane for Oral Soft Tissue Engineering"*.
