Public Notice

Please Conserve Water

Dear Customers,

Wages Creek cooperated for the last few days and the turbidity came down to levels that we could produce water. We were able to start the Water plant and run Monday 12/29/25 thru Wednesday 12/31/25. We are continuing to run the plant 1/1/2026 for as long as we can and hope to have the tanks fairly full. However, the rain forecast from Thursday 1/1/26 thru Sunday 1/4/26 is predicting around 4 inches of rain. If this happens, we will probably not be able to produce water until Thursday 1/8/2026.

We are respectfully asking our customers to still use water sparingly for the next week or until further notice.

Some of the things you can do to help:

- Don't leave water running in sinks while performing general hygiene
- Minimize laundry loads
- Don't water interior/exterior plants and lawns
- Take as short of a bath as possible
- Check that all your water hoses are turned off
- Listen for toilet leaks or running water
- Minimize the use of dish washers and laundry machines
- Report any water main breaks or water running down the road.

However, do not sacrifice health and safety.

Your assistance is greatly appreciated and we apologize for the inconvenience.

If you have any questions, please call John Morrill at 707-303-6677
