Scope of Work:

ITEM	QTY	UNIT	EXTENDED
1. Clear & grub small trees at the base of the spillway and clean up the materials that were deposited – grade must be below the bottom of the concrete flared end section 2. Re-use the deposited material to repair two points of erosion to the left of the concrete flared end section at the base of the slope 3. Line approximately 120 lineal feet of bank along the curve at top with limestone boulders. Geotextile fabric used under all rock. Approximately 300tons 4. Install check dams down the spillway to slow water flow – this is a critical point to prevent future erosion 5. Infill with MSD 7 rip rap (18"-24") Approximately 200tons 6. Replace the grate above the vault in the adjacent pond 7. Site restoration using grass seed, cover crop and straw Includes all material, equipment, hauling, operators, laborers, mobilization, and consumables needed for successful project delivery.	1	Lump Sum	\$75,983.00
Total			\$75,983.00

WAGES: ☐ Prevailing ☒ Regular Wage ☐ Union ☐ City

TIMELINE: ☐ Spring ☐ Summer ☒ Fall ☒ Winter Year_2020 EXPECTED MOBILIZATION LATE NOVEMBER/EARLY DECEMBER 2020
