Wires Over Wildlife

Missouri Department of Conservation and Ameren Missouri have created Wires Over Wildlife (WOW), a new program that encourages property owners to manage land for wildlife habitat where Ameren easements are located under transmission lines. Village of Green Trails Park trustees Harvey Rosenberg and David Kaplan are working with Missouri Conservation to develop the prairie habitat south of Ladue Road near the Woods Mill intersection. Missouri Conservation provides technical counsel and Ameren will reimburse the Village of Green Trails 75% to reduce the cost of seed and maintenance.
