An 'Easter Bunny' has been gifted in your name

For those living in rural African communities, this donation of a rabbit is an impactful gift with many - and multiplied - benefits. Your rabbit enables a family to breed with others and generate an income. This revenue is often used to feed their family, pay school fees and reinvest for further growth. A rabbit's manure is particularly rich in nitrogen, phosphorus, and potassium, acting as a super-fertilizer for gardens. This organic harvest booster, together with rabbit protein, provides a nutritious diet in areas of widespread food-insecurity. The plentiful breeding habits of rabbits means the benefits are quickly multiplied, and within a short time a pair is gifted by the recipient onto a neighbouring family.

Wishing you a
HOPPY EASTER!
