

New Kitten Checklist

- Canned Food
 - Purina Proplan Complete Essentials
 - Friskies Shreds
- Dry Food
 - Purina Proplan Chicken & Egg Formula

If you change to a different food, please do so slowly by mixing in a little at a time to avoid upset stomach. Pet food stores have higher quality foods compared to grocery store brands. Try to make sure that meat or seafood is listed as the first ingredient.

- Bowls for food and water – ceramic or stainless steel are recommended. Bengals love pet water fountains.
- Litter Box - start with normal 4-6" tall litter box and upgrade to deeper larger litterbox to limit litter being flung on the floor. Bengals are athletic. Fresh Step clumping or non-clumping is used here to cover odor. You can switch to whatever you prefer but should start with this brand so that they "go" where you want them to.
- Bedding and blankets
- Nail trimmer
- Scratching posts or blocks
- Toys – a wide variety of toys with different textures, sizes, and types like mice, wand toys, feathers, cat nip and laser points.
- Flea preventative
- Sturdy cat carrier

Additional Fun Things They Will Enjoy

- Cat running wheel
- Outdoor screened in areas/cat patio
- Harness with leash to walk outside and go for rides/adventures
- Cat tree or other safe climbing structures or cat wall shelves
- If you love to go on long outdoor adventures – Cat Backpacks

Recommended To Do's:

- When you get home close off one room to let your cat explore by themselves (without other pets. Let them take as much time as needed to adjust and come out of their carrier at their own pace. They may even want to spend a few days until they are comfortable.
- Schedule your kitten's vet appointment for the remainder of their vaccinations
