

P50 SERIES DATA SHEET

P52 & 53

LIQUID BUFFER / BARRIER FLUID

P52

Supports liquid buffer fluid for a containment seal chamber operating at a pressure less than the primary seal chamber pressure.

P53A

Supplies a liquid barrier fluid to a dual seal assembly operating at a higher pressure than the seal chamber

APPLICATIONS

API 682 PLAN 52

API 682 PLAN 53A

FEATURES

- Designed to ASME code Section VIII Div. I, Section IX Weld Procedures
- ASME U stamp available
- Designed to MAWP of Pump
- Flanged Designs available
- Cooling Coil Option

CUSTOMIZABLE INSTRUMENTATION OPTIONS
