About Global Fuji

Global Fuji Elevator Industry Co.,Ltd. is a professional elevator and elevator parts R & D, manufacturing and sales enterprises. The company is located in City of Suzhou , which is more developed in the Yangtze River Delta. It is within an hour's drive from Shanghai, Nanjing, Hangzhou, Wuxi. It has obvious regional advantages and convenient transportation.

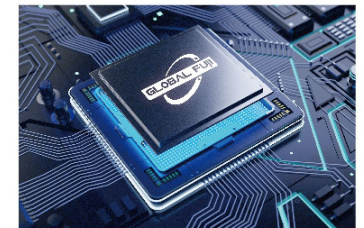

Global Fuji owns the complete production equipment, the leading manufacture craft & technology with the advanced configuraton, complete quality supervision system. Meanwhile, it owns the senior elevator parts research and development specialists and teams in China. It is far-sighted. It tries its best to build up a leading elevator parts brand in China. Global Fuji products are widely sold to over 30 countries and regions. It adheres to quality-first principle. It strictly accords with ISO9000 Quality System requirements in its operation. At the same time, it follows OTIS Q+ Quality System Standard. It ensures that every ex-factory product is fine in quality. It wins great satisfaction from vast clients.

Sales volume rises rapidly since the company establishment. It has established good coordination relationships with broad famous factories in China. The products are well-received by extensive users. Global Fuji will, as always, continuously and wholeheartedly serve vast domestic and overseas elevator manufacturers by high standard, superi or quality and excellent services. Let's together create great splendors!

LEADING TECHNOLOGY INHERITANCE OF CRAFTSMANSHIP

- Quality oriented manufacturing
- Every inch is exquisite
- Integration of intelligent technology and aesthetic customization
- Delightful and comfortable
- Embrace real life
- Entering is quiet, leaving is prosperous

Handrail: Rose gold stainless steel flat armrest
Floor: PVC

Platform Elevator

Free installation

No need for pit
Unique double guide rail design with built-in shaft

Security measures

Automatic fault rescue
Backup power supply ensures automatic leveling of elevators
Open the door to allow passengers to safely exit

Small and exquisite

The small well is exquisitely decorated,
Rich decoration configuration and humanized design

Intelligent interconnection

5G interconnection
Voice intelligent recognition operation
Traveling outside can also be remotely controlled

Major product features

Drive system and structural form

Global mainstream traction steel belt drive

Applicable scenarios

Duplex/Villa/Rowing/Single House/Self built House

Minimum shaft size

932 * 1000mm

Minimum top height and bottom pit depth

2300mm/80mm

Floor coverage

2nd to 6th floors

Running speed

0.3m/s

Escalator

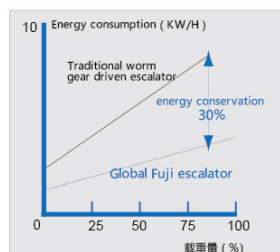

Compact space

It transfers large torque in small space. At low speed, it ensures high drive efficiency with little frictional coefficient. It is easy to establish kinetic pressure oil film with high drive efficiency. It saves energy. Escalator traction machine applies the internationally famous retarding mechanism, dynamic force transmission efficiency with extremely high wear-ability. Reliable and easily-adjustable brake-shoe style brake is between motor and reduction gears. It guarantees good automation properties, safety switch distance with smooth operation and very low noise.

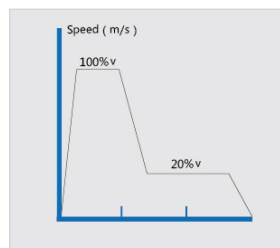

Effective transmission, variable frequency energy-saving

Compared with the traditional worm gear decelerator, precise and effective helical gear decelerator is more effective. It fully guarantees the efficient energy utilization. In variable frequency operation, it multiply detects the passenger flow. It automatically stops when nobody uses the elevator. It thus avoids invalid running and saves electric power.

Schematic diagram of the efficiency of helical gear reducer compared to worm gear reducer

Schematic diagram of variable frequency specification operation

Moving walk

Constantly stable operation, operating as easily as walking on firth earth

Tian'ao moving walk is low in noise, smooth in operation, durable in use, convenient in repair. It always performs very well in the aspects of safety and quality. As a high quality transport product, Tian'ao moving walk satisfies the clients' various requirements to the greatest extent. Safe, comfortable and attractive moving walk lets you enjoy the most relaxing and pleasant moments in outing and shopping.

Energy-saving running mode

It can apply variable frequency control or self-starting mode to fulfill energy-saving.
