PRODUCT DESCRIPTION

Our home elevators help passengers reach their floors quickly, comfortably, and safely. They provide quiet operation, which is especially important at night. For architects, they are easy to integrate into designs and help optimize available building space. For building owners, they help reduce total lifetime costs by providing excellent maintainability and reduced energy consumption.

FEATURES

1. Compact design in view of the limitations of space in a private residence.
2. Special facilities to meet the needs of elderly and handicapped persons, including wheelchair users, and
3. Quiet, smooth, jerk-free movement of the lift and Controls to have ease of operation.
4. No need for regular maintenance, different from traditional elevators, non-special equipment, no need for inspection, no need for regular maintenance
5. Economical and energy-saving, low cost, half of the cost of traditional elevators, the higher the floor, the more obvious the advantage.
6. Multiple protections, full-stroke anti-fall system, emergency descending device, anti-overload device, safety touch panel and other protective measures.

INDOOR INSTALLATIONS

The Skylift home elevator can be installed anywhere in the interior with a simple fixed point, and it is also applicable in the duplex building of high-rise building because there is no need for pit design and no need for height of the top floor. For building spaces where the top floor is not high enough, semi-high doors can also be customized.

OUTDOOR INSTALLATIONS

The Skylift household elevator not only supports indoor installation, but also can choose the special rain protection and corrosion protection for outdoor installation, which is beautiful, practical and economical. Transformation is convenient and simple, no reserved well road villa and double entry can choose outdoor installation.

INSTALLATION IN THE HOISTWAY

Although the home elevator has its own hoistway structure, it is also applicable to customers' existing elevator shafts with three brick walls. The hoistway material can be different panels and different materials (glass and painted steel), customized colors to match the home decoration style.

INSTALLATION AT FLOOR OPENING

Skylift family elevator is undoubtedly the most suitable product for indoor families who want to install the elevator but have no suitable space. The elevator can be installed here only by cutting the hole of the floor slab of about 1 square meter. Attic connection transformation or narrow space can choose this installation mode.
