

# WE ARE HIRING!

## Bioinformatics Trainer

BioCompin is seeking a skilled and enthusiastic Bioinformatics Trainer to deliver high-quality, remote training sessions.

### Key Responsibilities:

- The bioinformatics course remotely via online platforms.
- Provide hands-on training and guide students through practical projects.
- Assess and track student progress, offering constructive feedback.
- Prepare and share online course materials, including presentations, projects, and assignments.
- Stay updated on the latest trends and tools in bioinformatics.

### Requirements:

- Educational Background: A Master's or PhD in Bioinformatics, Computational Biology, Biotechnology, or related fields.
- Experience: Previous online teaching or training experience in bioinformatics preferred.
- Proficient in bioinformatics tools.
- Strong communication skills and comfort with online teaching platforms.
- Self-motivated with a passion for teaching and mentoring.
