

**Paper:** [Back When vs. Now](#)

**Date:** 02 June 2020 (rev. 13 Nov. 2021)

**By:** D. R. Shearer

**Topic:** The emergence of Truth has been the natural & Powerful response to the heightened absurdity that was initiated approximately 21 months ago. This rapidly emerging information, has allowed for a complete redefinition of what 'life on this planet' is. The natural outcome of this is a liberating & free existence, from a health perspective. This phenomenon is illustrated by this paper, when comparing previously programmed '*notions*' of our existence, with factual occurrences today.

For these reasons, this is truly [the best time to be alive on planet Earth!](#)

### Introduction

I have been aware of possibly harmful (chemical & other) introductions to our lives for over 4 decades (for example, the introduction to the food chain of 'aspartame', in 1984). While I have used this information to reduce or eliminate their harmful effects, a clinically precise definition of how our health has been impacted has not been well defined, until the past year and a half. This occurrence was the direct response to the globally imposed narrative (on mainstream media that is). The results of the re-definition of societal life, along with the remediation of particular negative influences is illustrated in the following analysis of an isolated (& previously accepted) malady.... namely the common "*cold*" or "*flu*".

### Back When

*What we were led to believe* - "Cold" or "Flu" - 'viral' or bacterial origin

*Supposed Causal Factor* - Infectious (Exogenous) Microbial Infiltration or "Contagion"

*The Storyline* - As Louis Pasteur would have us believe (for the past ~150 years), we are all victims of the "*microbe*" (a term invented by Pasteur). This invading pathogen comes into our body from the outside and proliferates to produce symptoms of varying severity (as listed). This is supposedly our bodies 'defence' strategy for overcoming this invading 'pathogenic' occurrence.

Symptoms - (severity - usually in the 9 or 10/10 range)

- 1) Sore throat (initial stage)

- 2) Mucus buildup - lungs/sinuses
- 3) Head pressure, congestive buildup
- 4) Tiredness

#### Duration -

10-14 days.

While this scenario made sense to the majority of people on the planet, for over a century and a half, it is by way of media & social/academic dogma/programming that allows for *this* understanding of 'disease'. Prior to March of 2020, even though I knew of, and protected my family from, environmental toxicity, I had no idea of the level of falsehood that surrounded the supposed 'disease' state (and indeed, the 'germ theory' model).

#### Now

Just because the predominant thought pattern suggests a certain paradigm, does not mean that that paradigm is correct. As Mahatma Ghandi stated, **“Error does not become Truth by way of multiplied propagation; nor does Truth become error because only one person knows about it”**.

The past 21 months have been an absolute gift in that the emergence of a refreshing Reality has occurred, and it will redefine life on the planet. This will not only will eliminate the massive falsehood narrative, but also bring lasting happiness & peace to those who avail themselves to it.

So, as the planet learns of the false nature of germ theory, we can now retroactively re-define existence, from what we were led to believe, so many years ago. We begin with accurately defining the causal principles that were not forthcoming (for so many reasons) back then:

#### **Actual Precipitating Causal Factors -**

- 1) Dental amalgam (mercury toxicity)
- 2) Refined carbohydrate (predominantly cane sugar) ingestion (nutrient lack; dietary imbalance)
- 3) Attitude/dread from the idea - “another ‘viral’ infection” (psyche/emotional turmoil/manipulation)
- 4) *Possibly* ‘heavy’ carnivorous diet (lack of efficiency; dietary lethargy)
- 5) Other various chemical (~140,000) & environmental toxicities (including Electro-Magnetic Radiation).
- 6) Pharmaceutical Drugs (chemical toxicity/poisoning)

**Remediation of Causal Factors** - approximate time of removal

- 1) All mercury removed from mouth – 30 years ago – Cilantro, chlorella and other chelating substances to purge the body & brain of metal toxicity
- 2) Severe reduction of all refined carbohydrates – since young adulthood
- 3) Germ theory is a 150-year-old falsehood that was *initiated* during the start of the *commercialization* of allopathic medicine – 18 months ago
- 4) Reduction, then removal of animal protein from diet – Vegetarianism (Jan 2020); Veganism (Jan 2021) – several physiological benefits
- 5) Chemical reduction (best efforts) – 35 years ago; EMF Radiation (from property) – 8 months ago – eliminated a newly developing cardiac arrhythmia (heart palpitation) in one week’s time
- 6) Last doctors visit for a non-trauma-based condition – 45 years ago; removal of **all** home-based analgesics (Tylenol, Advil, etc.) – 6 years ago

### Conclusion

Almost astounding is the contrast between the conscious realization of thought, prior to 21 months ago and the *higher Reality* that is becoming the norm today. Back When vs. Now are 2 *completely different* paradigms. The absolute misery of what we have been led to believe was a “viral infection”, is now the body addressing a **toxic circumstance**, and nothing more. The condition previously known as the “flu” or a “cold”, is no longer a part of my existence. The most it amounts to (possibly from a lack of sleep) is a slight feeling of something being off. This condition is easily eliminated by one, or more, of the following:

- 1) Increase fluids (pure groundwater preferably), and/or
- 2) Get proper sleep, and/or
- 3) Possibly a partial or full cleansing fast (Dr. Christopher’s 3-day cleansing juice fast is recommended for anyone who may require it).

As we learn about the extensive research of Professor Antoine Bechamp & his able colleague, Professor Alfred Estor, we now understand that the fake ‘virus’ particle is nothing more than a *microzyma*. Microzymas are found everywhere in abundance and by way of pleomorphism, are essential components to our physiology, **of which we would not be here without**. Genetic updates via a multitude of microzymas (the previously referred to “viral infections”), are occurring millions, billions or trillions of times a day. That which *microbial medicine* cannot explain, is easily understood by the **microzymian model**.

When humans are laden with ‘foreign’ suppressors (negative dietary influences, EMR, latent chemical presence & environmental toxicity) the genetic update system, every so often, triggers an increased ‘disruptive’

response. This has been previously defined as a “cold”, “influenza” or worse, cancer/heart disease/diabetes, etc.. All are *symptomatic response conditions*, and nothing more. As it is a waste of time ‘shooting the messenger’, so it is with the *cut, burn, poison* plan of dealing with symptoms by allopathic medicine. Dr. John Harrison pointed this out clearly to us in the early 1980’s.

It is clear, that the removal of a good portion of the foreign suppressors, allows the body to address any situation in a near *symptom-free* manner.

The removal of the ‘foreign suppressors’ is becoming difficult, and will become increasingly difficult, for city dwellers by way of the following:

- 1) Lack of access to an unprocessed & organic food source, and
- 2) City generated air pollution, and
- 3) **Prevalence** of EMF radiation, and
- 4) An unpolluted water supply (both chlorine and fluoride are **poisons**).

The ability of a rural dweller to remove a good deal of all foreign suppressors is very much (currently) intact. The availability of this opportunity will remain as we move our planet into a condition known as being, “**Settled in Light & Life**”.
