

The Reasons Why Support to the Canadian Government Should be Withdrawn

Introduction

Pretty much any of the following reasons are good enough to stop paying taxes, if you really think about it. Doing so sometimes involves moving one's life into the private, and aligning with Common Law (God's Law). There may still be many who do not know what this is or actually who God is. This is irrelevant, because the effects of the programs listed below will ultimately 'nudge' folks in the correct direction. The physical vehicles to move into the private include the Private Membership Association (PMA) and The (Family Express) Trust. Both of these items provide a degree of protection while standing with your Sovereign Right as a man and/or woman.

Any one of the listed items happens to be evil & malicious. This is in line with what we now know is the 'globalist agenda' and eugenicist practices. It is up to all of us on the planet today whether we will accept these insidious ideas as part of our 'new normal', or do we wish to re-instate morality, integrity and ethics. The Power of Love will see us through. The choice however, is up to the masses.

So, because the Canadian government chooses to inflict upon the population the following items, every man and woman must decide for themselves if this is OK:

- 1) The killing/maiming due to forced vaccination (as per evidence – Edward Dowd),
- 2) The killing of the population by way of the MAID program – “medical assistance in dying”
 - killing individuals because they are depressed or have financial problems,
 - promoting the MAID program to children in children's books,
 - actually condoning the termination of a child's life on this basis,
 - real acronym – “MURDER, Actually in Death”
- 3) The intentional psychological manipulation of our children to create the condition known as “gender dysphoria” [aka gender confusion] and the monumental social implications thereof
- 4) The promotion and inclusion of pornographic & incestuous material into the school system, while the distribution of pornography to children remains to be a criminal offence.
- 5) The intentional manipulation of the general public to suggest that it is normal for children to have myocarditis & strokes (the condition of autism has been long accepted as 'normal').
