

# The Truth Shall Set You Free

D.R. Shearer

12 Aug. 2021 (rev. 01 Oct. 21)

All humanity has been endowed with an amazing & powerful gift – that being the gift of Free Will and choice. When this gift is augmented by facts & research along with a reasonable amount of logic, it has the Power to truly set an individual FREE!

Prior to March, 2020, the 2 decade long, systematic roll-out of fancy acronyms designating the latest ‘pandemic’ microbe that is attacking humanity, was something that I didn’t pay much attention to. The scenario did not affect my life, nor did it have much effect on the lives of anyone that I knew. Aside from my research into the dangers of vaccination in 1988, prior to the birth of our first child, I didn’t pay any attention to sensational news reports, on anything. And having not visited a doctor in over 45 years (for non-trauma related issues), I was indeed removed from most of the ‘dangers’ that were supposed to be present in our lives.

When the beginning of the current, global ‘distress’ first showed up (March 2020), immediately something seemed ‘not quite right’. What was initially a process to protect myself & family, then became a much bigger event whereby I needed to know the entire body of evidence that supported,... or denied the new paradigm of locking down planet Earth. These 18 months have been an absolute blessing, because the uncovering of Truth (which has resulted in the material contained within our Truth Centre), has truly brought freedom, peace & contentment, in my wife’s and my life.

I don’t remember the precise steps that began the process of uncovering Truth, but the results of the process are as follows:

Having not participated in the barrage of ‘pandemics’ affecting the planet, or experiencing the effects of such suggestions, it was natural for me to begin to question. While it has been uncovered, through this process, that a lot of our history has been altered and censored, it remains as fact, that it is an impossible task to completely bury the Truth. This is probably because, as most would know, this is a monumental task, to say the least.

Many of the names and situations that I will relay in this article, were at one time, obscure or unheard of – this is simply the result of the propagandized manipulation that has occurred, in our past. Many of these names and situations are now almost everyday words in the lives of many people – this being a natural indicator of the imminent emergence of Truth.

The intuitive feeling of a new pathogenic “microbe” emerging every year or two, being both experientially and logically unreal, became fully authenticated by a comprehensive search into what humanity has been led to believe is truth... but which is actually falsehood, on many

levels. Research into the beginnings of this situation (pathogenic, exogenous “microbes”) takes a person back 475 years when in 1546 the first notions of “germs” were uttered. But the formal *commercialization of medicine* did not occur until the latter half of the 19<sup>th</sup> century, at which time the **severely limited** scientific abilities of Louis Pasteur invented the word “microbe”. This incorrect view of physiology (as it turns out) was not without an impressive & well documented opposition, logged into the French Academy of Science. This somewhat more complicated view of Reality as pertains to human physiology, was supplied by (primarily) 2 Professors by the names of Jacques Pierre Antoine Bechamp & Alfred Estor. These two dedicated scientists were professors, physicians, micro-biologists & chemists. Their lab work was **corroborated & confirmed** by their findings in the clinical setting, both being physicians.

It was due to the simplicity of the ‘one germ/one disease/one pill’ remedy that fuelled the commercialization of medicine, and it was the simplistic nature of the claim that captured the minds of the general public. All this was occurring while Bechamp & Estor were squirreled away in their labs, doing more to uncover the mysteries of life than anyone prior, who didn’t have the ability or intelligence to complete. Professor Bechamp stated, “To best understand the Creator, it is best to look at His Creation!” His abilities as a microscopist, ‘outstripped all of his contemporaries’.

**But** it was the keenness to acquire political favour, that were the talents of Louis Pasteur, which played supreme to his mediocre talents of being a chemist, that dictated the following 150 years (and counting) of human misunderstanding & suffering. Indeed Dr. Montague R. Levenson (New York physician) made this statement in 1912, regarding the documented evidence of Professor Antoine Bechamp – “But thanks to his researches & discoveries it cannot be long before the medical profession will recognize the dangerous errors into which it has been led...” I am sure that Dr. Levenson did not know, back in 1912, that ‘it cannot be long’ would end up being 100+ years!

Regarding the proven & documented research of Profs. Bechamp & Estor, essentially their understanding of how physiology works plays a large part in an individual attaining the state of ‘the Truth shall set you free’. This has been a large contributor of this condition in my life and here, briefly, is a synopsis of the predicament that set humanity on the wrong path:

The whole discussion comes down to one simple debate – Pasteur claimed that invading ‘microbes’ were the cause of ‘disease’ and Professor Bechamp research led him to state (of the microbial or germ theory), “The greatest scientific silliness of the age”. And of course, Bechamp could not foresee that this silliness was going to dictate many ‘ages’ to come.

Microbian medicine was disproven on several clear accounts by the work of Bechamp and his team. A couple of examples are:

- 1) the complete isolation of a piece of meat to outside (supposedly invading) micro-organisms and finding the responsible organisms of decay throughout and in the centre of the sample. – “disease is born in us and of us” – a quote from “Old Medicine”

- 2) Prof. Estor proved unconditionally that the bacteria present in the condition known as gangrene, were the *result* of the condition, not the *cause* of it. (i.e. bacteria are the necessary pleomorphic effects of microzymas)

The details of the foundation of physiology (actually the beginnings of cytology) from Bechamp's research was in the discovery of a microorganism subsidiary to the human cell (the cell, at the time, was thought to be the foundation of life – the research of Prof. Rudolf Virchow). The micro-organism that was discovered was termed "microzyma" ('little bodies') and had the capability of 'morphing' into other necessary types of organisms (bacteria, etc.) to perform certain tasks, depending upon the stage of life and the prevailing conditions (particular to each stage of life). This morphing characteristic is called "pleomorphism", and is in direct conflict with the "monomorphism" of Pasteur. The condition of pleomorphism, as **observed** by Bechamp and his colleagues, allowed for the multi-functionality of the microzyma to respond to prevailing circumstances, in sustaining health and maintaining physiologic functions.

Professors Bechamp & Estor's research in revealing the foundations of physiology (cytology), have been repeated throughout the past 150 years, by many others. Consistent with the altering of history, many of these scientists that *did not* subscribe to the established narrative have been either suppressed, discredited and/or eliminated (eg. Royal Rife, Gaston Naessens, Gunther Enderlein, Philippa Uwins, Robert O. Young, etc.).

As humanity continues to stumble its way through a less than perfect existence, what has been revealed in an ever-increasing fashion, over the past 18 months, can be termed "the emergence of Truth". It is the very nature of this unique and Powerful occurrence that has brought about the opportunity to be truly **free**. This is an imminent process that was *always* going to make its appearance... and is a **direct result** of the false dictates that have been running our planet.

As mentioned, the body of evidence that is contained within the Truth Centre produced Freedom & Peace in my life. While the understanding of such evidence may be a bit more complicated than the 'one "disease" - one pill remedy' theory, it is still well within the grasp of the average individual. As such, the Truth Centre will remain sitting quietly in Keremeos, B.C. & online and through our zoom meetings on Saturday nights, for all who wish to ascertain the benefits that can be gained from it.

"Where there is no God... all is permitted."

Fyodor Dostoyevsky
