RESIDENTIAL WATER SOLUTIONS: WHEN YOUR HOME IS YOUR CASTLE ...AND YOU DON'T WANT A MOAT.

Over 70 years ago, Square D set the standard for innovative, high quality water pressure switches, clearly establishing itself as the #1 brand in the industry. Using the same spirit that created the Square D legacy, Telemecanique Sensors has integrated today's advanced pressure control features into high performance sensors that are as reliable as they are easy to use.

The result? A complete line of time-tested water detection products that reliably manage residential water systems. The Telemecanique Sensors XMLP Pressure Sensor monitors water pressure; the classic Square D 9013FSG Switch controls pressure and powered water pumps; and the Square D 9036-8 Float Switches detect water levels to control the pump.

Using these proven solutions will help keep you - and your castle - above water.

STABLE. DEPENDABLE.
