

### ABOUT

It is important to take preventative measures in wildfire prone areas while also preserving the beauty of the surrounding desert.

Let us help you take the next step to increase safety of Arizona neighborhoods from wildfire threat. We remove invasive and dead debris to create a defensible space between desert and homes.

**BEFORE**

Removal of dead/invasive plants from fence line and thin up to 20ft.

**AFTER**

Defensible space is created.

(Skunk Creek Wash Project)

### OTHER BENEFITS

- Increasing safety without removing protected native plant species.
- Recommended by local fire departments.
- Improved water flow through riparian areas while decreasing combustible plant material.
- Giving communities increased sense of safety during wildfire and monsoon season.
