

## Testimonial

*"In 2021, at the height of the pandemic, we downsized to a house located in a small bare land strata in Kelowna's hospital area. Holli and Jared had done some landscaping and rock work at our previous house, so we were familiar with the quality and attention to detail they brought to their endeavors.*

*Our new-to-us house, built in 1989, needed a complete redo, which was more than a bit daunting. By this time Holli and Jared had created their own company, HH Landscape Services, so we decided to give them a call. Doing so was easily the best decision we made in the complete outdoor and indoor reno project we had undertaken.*

*Working from a conceptual plan our landscape architect had developed, HH reworked every square inch of our yard, except for the existing driveway (and even that was modified). When design decisions were required, we were given great options to choose from. When the inevitable problems arose, we were presented with workable solutions. And, the execution of the work was flawless. Holli's deep horticultural knowledge is exceptional, and Jared's ability to manipulate stone, earth, and rock, all the while paying close attention to drainage and site preparation, is second to none.*

*Cost estimates were provided at the outset and revised only if unanticipated problems were encountered. Communication throughout the process was excellent. Care was taken to work within existing Strata guidelines and to communicate as required with Strata Council.*

*HH continues to provide ongoing landscape maintenance services for us and in that regard, too, their performance is first-rate.*

*We love the outdoor living space our new yard provides, and we often receive compliments on it from neighbours and passers-by.*

*Anyone looking for high-quality landscape services and solid value for money should get in touch with HH. Holli and Jared are really good at what they do!"*

*- J. Hampton*
