Story of Impact

"We are so much at ease with bringing our son to Lighthouse knowing he is receiving the things we want him to have in curriculum, therapies, and friendships. It is beyond comforting to know he is surrounded by caring and understanding people in the teachers, therapists, and the other students."

- Mylie Williams, Lighthouse Parent

Program Highlights

Academics

Alveary offers a complete and comprehensive curriculum, true to Charlotte Mason's model of education.

Therapies Provided

- Speech
- Occupational
- Applied Behavior Analysis
- Physical

Outdoor Learning

Nature-based play, nature walks and sensory exploration across 20 acres.

Community Life

Bible Lessons, family events, shared celebrations and parent learning opportunities help build a community for each student.

Our Classroom Structure

At Lighthouse, every classroom is built around the educational and therapeutic needs of the student. The Guide leads instruction and curriculum, while the Classroom Lead Therapist and Registered Behavior Technicians—under the direction of a BCBA—work directly with students to implement behavior plans and teach adaptive skills.

Therapists deliver in-class support when it best serves the student, connecting therapy directly to instruction. This integrated model blends curriculum, therapy, and behavioral support so each child can learn, grow, and thrive.

Looking Ahead

Our priorities moving forward are, first and foremost, to remain mission-aligned. We are committed to ensuring that every family who needs our services can say “yes” to Lighthouse by maintaining the lowest possible cost of access. By building a sustainable financial aid fund, we are reducing our dependence on state funding while also investing in our staff through expanded professional development, improved benefits, and more competitive salary and hourly compensation.
