Queen Mother Admits Gray Hair

United Press International

LONDON, March 26.—Queen Mother Elizabeth, 62 next August, has decided it's time to go gray.

This week Londoners seeing her out after dark have been startled by the frankly gray-white wings in her dark brown hair. They have been there for some years but skilful coloring has concealed the fact until now.

The Queen Mother apparently has decided not to bother any more. After all she is a grandmother four times over and, she says, "I'm getting on."

of May on the lonely northern coast of Scotland.

The Queen Mother likes to travel and is looking forward to doing some in the next few years. But she'll try to do as much of it as informally as she can.

She is anxious to pay another visit to Canada and the United States. She still talks about her New York visit in 1956 and the fun she had "doing the shops" there.
