

2023 Legislative Analysis Project

Thank you for following the Republican Women of Sheridan County Action Alerts on Wyoming State legislation. The Republican Women of Sheridan County (RWSC) is the largest Republican Women's group in the State of Wyoming. Women and men can be members and associate members, respectively.

Legislative Analysis Project

The RWSC began following Wyoming state legislation in 2019 with the goal of communicating to legislators our input on the legislation that they consider during the session. Other counties in Wyoming have begun to do the same thing.

Voters want their voices to be heard and this has become an effective way for Republicans to do that.

In the 4 years that we have been involved in this process we have gained experience in reviewing and following bills as they wind their way through the legislative process. We follow legislation throughout the process – we read the bills, we research the issues, we watch committee testimony in person and on video, we watch how bills are amended, and we talk to legislators.

Our committee meets regularly during the session and interim to discuss the bills that we are following. We publish our position on legislation (support/oppose) when we have an understanding of the bill and a consensus on how we believe that the principles of the Republican Party apply to that bill.

Legislator Voting Data Analysis

This year, for the 2023 Wyoming Legislative Session, the RWSC is adding a new resource for your review. Upon careful deliberation the RWSC took positions on 70 bills this year. In order to help us understand how our legislators are representing our views as constituents, we have compiled voting data for those 70 bills. The most concrete way to quantify a legislator's representation for us at the Capitol is to measure their actions (not their words). Their actions are clearly defined when they vote on a piece of legislation.

Whenever a vote was taken to support/oppose a bill we've taken a position on, we recorded that vote. We have tabulated the number of times a legislator's vote supports our position and the number of times a legislator's vote opposes our position.

By utilizing a large number of votes, we can identify trends and voting patterns. It is important to note that the RWSC took positions on bills prior to and throughout the legislative process. Many of the bills that we took positions on were fiscal in nature, and they provided a clear opportunity to directly apply principles found in the Wyoming Republican Party Platform.

There will always be differences of opinion on policy and we welcome the debate of those differences. Informed debate is critical to formulating the best policies for the state of Wyoming. There are no legislators (R or D) who matched our positions 100% of the time. There are no legislators (R or D) who opposed our positions 100% of the time. They all fell on a continuum. We are not assigning a “grade.” We are simply reporting the data for your consideration.

The 70 bills that we took positions on are attached, along with a link to look up legislation, watch the recorded committee debates that occurred in session, and count up the votes for yourself. A representative republic can only be successful when voters are informed and active. We welcome your participation in the process.

Tabulation of Voting Records

The RWSC took a position on 70 bills. For each of those bills, we tracked the recorded vote on those bills by every legislator. That includes committee votes as well as final floor votes on Third Reading.

Every time a recorded committee vote and final floor vote by a legislator matched our position, they were awarded 1 point. Every time a recorded vote by a legislator did not match our position, they were awarded 0 points. The total number of points awarded to a legislator was divided by the total number of recorded votes cast by that legislator to arrive at a percentage. For example: if a legislator’s vote matched our position 35 times (35 points awarded) and opposed our position 15 times (0 points awarded), then that legislator would receive 35 points out of 50 maximum points possible. The resulting percentage is $35 / 50 = 70\%$. If a legislator did not vote, or was Excused from voting (due to absence, etc.) then no vote was recorded and no potential point was included in the total points available. No one’s score was impacted by an excused absence or the lack of an opportunity to vote on a bill.

The attached tables illustrate the data we collected. The average number of votes counted for each legislator was 45. The low was 33 and the high was 57. The number of votes recorded for each legislator are different because they are in different chambers (House/Senate) and on different committees. The percentages indicate the percentage of times that a legislator’s votes matched our position.

Below are the list of bills used, as well as the list of Representatives and Senators and their percentages. Please feel free to email with any questions!!

Republican Women of Sheridan County
Legislative Action Committee

Bill	LAC Position	Bill Topic
HB0004	No	Expand Medicaid one year postpartum
HB0006	No	Election Records Not Subject to Disclosure
HB0007	No	Turning a Parental Rights Decision re Marriage Over to a Judge
