### ADDITIONAL BENEFITS

Enjoyment, Engagement, Participation, Fun, Engagement, How motivating it is, Fun, Interactive, Motivation, Can engage students who might otherwise not wish to participate and encourage them to work on grasp/release and task initiation; I've seen students with little to no volitional movement independently move their limbs to activate the Beamz and it is really exciting to see!

### RECOMMEND

Highly Likely to Recommend:	57.1%
Likely to Recommend:	94.2%

### OTHER COMMENTS

The Beamz interactive music system is fun, sophisticated, responsive, and adaptive. It promotes equitable learning for individuals of all ages and ability levels, fosters curiosity and creativity, and is an invaluable tool during therapy sessions.

Beamz engages students who might otherwise not wish to participate and encourages them to work on grasp/release and task initiation; I've seen students with little to no volitional movement independently move their limbs to activate the Beamz and it is really exciting to see.

I cannot say enough about how the BEAMZ units have added to the musical experience for my clients. You do NOT need to be musically talented to enjoy the benefits of this amazing product. WE LOVE BEAMZ!

Thank you for supporting our students. They love the Beamz and smile from ear to ear whenever they are given the opportunity to use it.

Beamz provides the student with instant reinforcement and motivation to move.

Beamz makes therapy fun – it brings motivation and laughter into our OT sessions.

T. King, OTR

Keep up the good work and thank you soooo much for the donation.
