

Repatriation of Currency or Funds

IDRC has the ability to either repatriate your funds to the United States or to any other country or banking system. We can obtain approval and transfer codes for your funds to move to the United States and or other countries. What we normally do is provide you with a seasoned account in the country of your choice with the corresponding amount of funds in your account less our fee.

We have the authority to take in any AU and have it placed into the financial system. We will have it taken through a refinery to establish the payout. The Refinery will set up the account and pay you wherever you agree to after the gold has been refined, assayed and hallmarked.

We are one of 3 contractors for the U.S. government that has the ability to authenticate and repatriate currency, boxes, bonds or financial assets of value. We are happy to look at anything that you have but there are some guidelines that must be adhered to.

We will need the CIS on the owner of any item that you would like us to review. Any person that you bring forward will have to be screened to ensure that they are not affiliated with any terrorist organization.

Once we determine that the owner is not terror-related then we will need to authenticate the asset as well as thoroughly research the history of ownership.

The first thing that must be completed is to have a complete history of the bond or box. This is started by tracing the bond or box to the original source and then conducting a complete transactional history of that particular instrument to determine if the instrument has been paid out, demonetized or if they instrument is counterfeit.

This requires someone with top security level access above the normal financial screen level and authorized access to the highest level of the financial institutions and financial industry.

We look forward to working with you and we welcome any items of value that you may have.

There have been many changes in the financial world in the last 2 years and the movement of any financial asset must be approved at the highest government level as well as the IMF, BIS, FBI, INTERPOL and others. As you know you can no longer just wire large sums without them being frozen. IDRC has the ability to facilitate these transfers and means to assist you with gaining compliance.

For anyone to move or receive large sums of funds internationally or from the U.S. government under the current aggressive repatriation agenda strictest of compliance is required.

The agency has been commissioned to repatriate currency and assets that have previously been denied. This is a great time for you to move any assets that you have available, due to the extreme motivation to advance the U.S. infrastructure program we can also provide you with a tax treaty for your funds and immunity if they have not been declared.

The new regulations are very harsh for anyone attempting to move funds internationally. IDRC has the ability to navigate these new regulations and provide you with successful results. We have the experience and qualifications required to take in large amounts of USD or other currency.
