

# FOR IMMUNE SUPPORT & DIGESTIVE HEALTH

## A PROBIOTIC FOCUSED ON IMMUNITY\*

### A Probiotic Formula Specifically Focused on Immune Support!

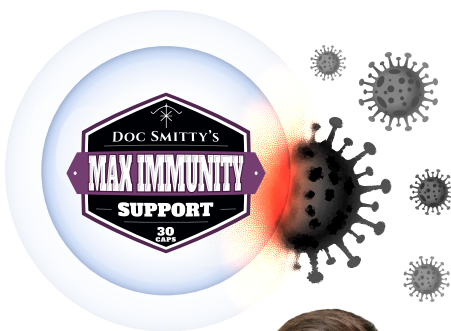

Max Immunity is a blend of 16 unique 'microencapsulated' probiotic strains. Microencapsulation ensures the probiotics arrive 100% alive and viable to the small intestine. This formula was created for its affinity to produce antibacterial and antiviral activity, as well as support overall immunity and digestion. Max Immunity has also been clinically proven to colonize and adhere to intestinal walls 5 times better than typical or uncoated probiotic strains.

## IMMUNITY PROBIOTIC

Great care was taken while developing Max Immunity probiotic blend. Max Immunity was produced in a GMP approved facility.

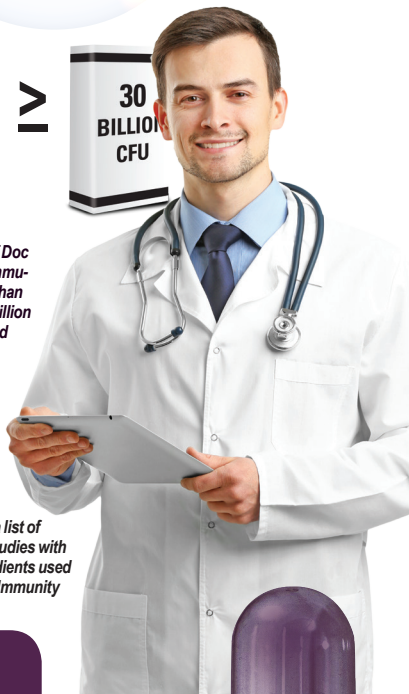

### Max Immunity is Your Once Daily Way To Boost Your Immunity and Fight Back Against Health Compromising Viruses!

It's never been a better time to ensure your protection against illness caused by viruses. No better way to improve your body's natural ability to fight off infection than with immune boosting foods, vitamin supplements, and our Max Immunity Probiotic formula. Max Immunity's specifically selected probiotic strains work harmoniously together to provide your digestive system with daily advanced immune boosting power.

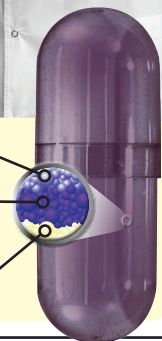

6 Billion CFU of Doc Smitty's Max Immunity, is greater than or equal to 30 Billion CFU of uncoated strains!

Contact us for a list of medical case studies with probiotic ingredients used within our Max Immunity Blend.

ElderMune™ (20,000mg elderberry)  
Sunfiber® (Prebiotic/Postbiotic)  
Microencapsulated Probiotics (16 strains)

## COMPREHENSIVE IMMUNITY FORMULA\*

- 6 Billion CFU before multiplication\*
- 16 Strains of Probiotics\*
- 5 Times more effective with Microencapsulation\*
- ElderMune™ Immune Support\*
- Includes Organic Sunfiber® Prebiotic/Postbiotic Blend\*
- Shelf Stable\*

### Max Immunity Features: *Black Elderberry*

Black Elderberry has been studied for its antibacterial and antiviral activity; it was found to be active against human pathogenic bacteria as well as influenza viruses<sup>1</sup>. The Cleveland Clinic has long recommended elderberry for colds and flu<sup>2</sup>.

ElderMune™ is an innovative new NutriScience product containing elderberry juice concentrate combined with Sunfiber® (partially hydrolyzed guar fiber). This combination of elderberry for immune support and Sunfiber®, a prebiotic, soluble, dietary fiber, has synergistic effects on digestibility to enhance the absorption of nutrients.

Sunfiber® is blended to replace the fiber that is lost in the elderberry juicing process. It also supplies the prebiotic and postbiotic functions, supporting the production of short chain fatty acids acetate, propionate, and butyrate. These help restore the epithelial lining, in the intestines.
