OUR HISTORY

Makefast was founded in 1974 by Bill and Brenda Brown, who had a passion for engineering and a desire to create innovative safety solutions for the Marine industry. Bill and Brenda Brown's first product was a ring and turnover for sailmakers, which was unique in that it could be pressed rather than hand-sewn. This innovation helped them gain recognition in the sailing community, and they continued to expand their product line with new and innovative solutions for the boating industry. Their commitment to quality and customer satisfaction has been a driving force behind Makefast's success over the years.

Fast forward to 2022 when Makefast USA Is Born

Makefast USA LLC opened in Maryland. In addition to selling and servicing sunroofs and awnings to our US customers, they will promote all of the Makefast range of products. At our new base in Maryland, we aim to offer the highest level of customer service and after-sales support.

As part of this Makefast USA are pleased to announce the upcoming launch of extended warranties for our marine systems starting with the Sun awning system.

This enhancement to our warranty package is in addition to the Makefast Service website which allows our customers access to an ever-growing network of highly trained & competent service technicians located around the world. The site contains detailed technical documentation to assist marine engineers and service technicians. Including downloadable work instructions and service videos for all the Makefast marine systems

S U N A W N I N G S

The Makefast USA Sun Awning offers temporary shade out of the glare of direct sunlight, creating a perfect area for entertaining or just enjoying the view!

Awnings can be situated on any deck, on any size boat.

The Makefast Sun Awning is designed to be discrete, utilising a near-silent motor.

The low-profile system retracts fully inside the structure of the boat and is hidden from view.

The Makefast USA roller blind enables a vertically retractable shading option as well as the ability to define a space. This versatile design is available in manual or powered variations to suit every possible application.

B L I N D S

The powered system allows the user the flexibility of stopping the blind anywhere along its drop. The manual system features spring tensioning to either auto-retract from fully extended or allows it to stop at set positions with the self-locking system.

Designed to provide maximum coverage for both cabin & flybridge boats

The Makefast USA canvas roof system has been the market leader for over 20 years. Smooth operation combined with low maintenance make it the perfect addition to any boat.

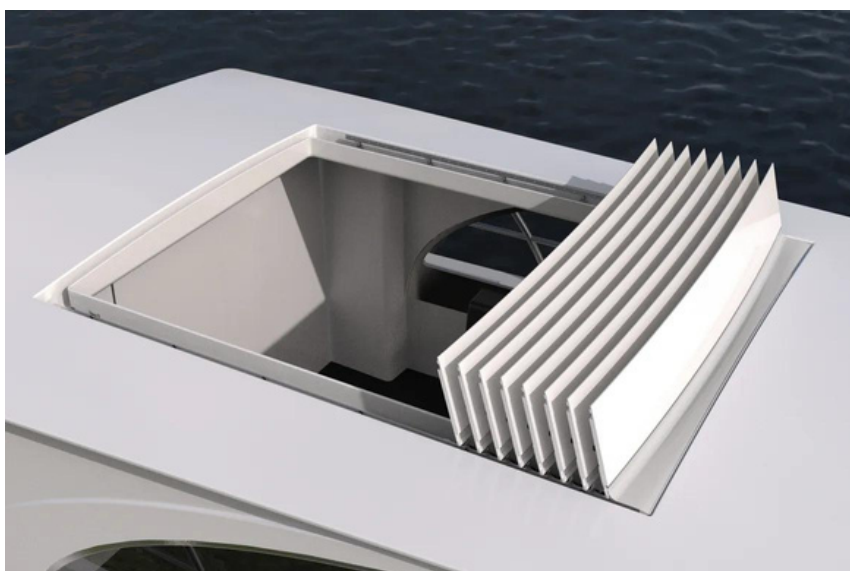

Using the highest quality materials, the Makefast canvas roof system is suitable for the harshest marine environments. Featuring friction-free cars and marine-grade 316 stainless steel components ensures it performs effortlessly, combining the ultimate in style and luxury.

L O U V R E R O O F

The high-quality Makefast USA Louvre Sunroof system features rotating and retracting louvres in a single roof, which allows a choice of shade and ventilation styles.

Once rotated to the venting position, the louvres can be fully retracted to give an open area. Alternatively, leaving the louvres vented allows a free-flow breeze and dappled shade.

This latest addition to the range is a high-quality option for any boat as it incorporates industry-leading technology in a marine environment.

The Makefast USA Shade Sail systems and associated hardware are the perfect way to create additional shade on your boat.

Our comprehensive range of carbon poles and stainless steel deck hardware have all been designed with aesthetics and ease of use in mind. There is a solution available for every possible design scenario.

P A N E L R O O F

The lift and slide roof is an innovative and elegant design that provides an extensive opening of the cabin space to the sea air.

The system incorporates a controlled locking and sealing system which aids climate control, ensuring a perfect temperature is maintained in the living space.

With the addition of the sliding panel system, the Makefast USA panel roof range provides the perfect solution for boat builders and designers looking to incorporate a sunroof into any style of boat, even with compound curves and modern sleek designs.
